REPORT SYNOPSIS

Drug Discovery & Development is the principal application for Apoptosis Assays, which, however, is anticipated to maintain the slowest CAGR over the analysis period. In contrast, the market for these assays in Stem Cell Research is poised to grow at a rapid pace, owing to the increasing number of stem cell research activities and an increasing investment in the same. Further growth in the market can be expected from government initiatives aimed at increasing the number of cell-based research activities, all of which point to a market for Apoptosis Assays that is flourishing.

While COVID-19 may not have an adverse impact on the market for Apoptosis Assays as anticipated, there is a definite slowdown in demand, which has to be addressed with requisite measures.

Accounting for an estimated share of 42.5% equating to US\$1.7 billion in 2019, Apoptosis Assay Kits lead the demand for Apoptosis Assays globally, which is expected to maintain a 2019-2026 CAGR of 9.9% and reach a projected US\$3.6 billion by 2026. The overall Apoptosis Assays market, globally, expected to touch US\$4.5 billion in 2020.
