REPORT SYNOPSIS

Gas Detection Equipment finds application in a range of industries as the primary option for the early detection of leakage of flammable and toxic gases and vapors, owing to which these systems have maintained relatively good demand. The Chemical/Petrochemical and Refinery sector is the largest, as also the fastest growing, market for these devices, as they play a critical role in saving human lives and other assets in case of serious mishaps associated with this industry. Detection of toxic and flammable gases is a key component of these systems, and, if achieved with early warning signs, can be crucial.

The global demand for Gas Detection Equipment by application is the largest for Chemical/Petrochemical & Refineries which is estimated at a share of about 36% in 2020; and is also primed to register the fastest 2020-2026 CAGR. The overall global Gas Detection Equipment market for 2021 is expected to reach \$4.4 billion.
