Report Synopsis

Polycarbonate are used in a wide variety of applications including optical storage media, electronic equipment, automobiles, construction, greenhouses, exterior lighting fixtures, sports safety equipment, and medical devices. Polycarbonate products are often found in electronics which make use of their electrical insulating, heat-resistant and flame-retardant properties. Due to their impact resistant and smooth surfaces make them well suited for use in automotive headlamp lens covers.

Demand for Polycarbonate (PC) resins worldwide was declined by 2.4% year-over-year in 2020 due to reduction in demand from automotive & transportation applications amid the impact of coronavirus pandemic. Global demand for Polycarbonate (PC) resins recovered sharply in 2021 and continued the momentum, attributed to firm demand from appliances and electronics sectors and recovery in automobile production.
