Abstracts

The influenza vaccines market in Americas is anticipated to reach nearly US\$ 3 Billion by 2021. Influenza is a highly communicable disease and typically has the most severe impact on children and the elderly. Influenza viruses are considered as a major cause of morbidity and mortality worldwide. The vast population base together with significantly low vaccination coverage in emerging markets, rising government support for immunization and growing awareness of the value of influenza vaccine in preventing disease are the prominent factors that will fuel the growth of the influenza vaccines market.

In the Americas, United States captures majority of the influenza vaccines market share. Brazil is the second leading market for influenza vaccines with around XX% share in 2015. Canada and Mexico are the third and fourth leading market for influenza vaccines with XX% and XX% market share respectively in 2015.

In the influenza vaccines brand sales segment, Sanofi's Fluzone holds the maximum share of the market being followed by Fluvirin/Flucelvax. GSK's Fluarix/FluLaval accounts for the third highest share of the influenza vaccines market. FluMist/Fluenz and Afluria/Fluvax stands at the fourth and fifth position in the influenza vaccines market, while Flublok has captured least share of the influenza vaccines market.
