## Abstracts

Kidney transplant is the most commonly conducted transplant surgery worldwide. It has gained widespread popularity by improving the outcome of end-stage renal disease (ESRD) patients. With advances in kidney transplant methods and improvement in transplant success, a kidney transplant is now widely considered to be the best way of treating chronic kidney disease for many people. As the number of organ donors is increasing, an increase in transplant procedures is bound to happen. However, due to costlier procedure the market shift is expected to occur in Asian and Middle East countries where medical tourism is being promoted.

Kidney Transplant Performed Analysis: In Asia and Middle East region, India, China and Iran are the major players as they perform the most number of kidney transplants. Together these countries account for around XXXX% of the total kidney transplant performed in Asia and Middle East. China and India are closely competing with each other in the number of kidney transplant performed. Iran stands at the 3rd position in Asia and Middle East kidney transplant number. South Korea, Japan and Australia stand at the 4th, 5th and 6th place respectively in 2014.

Kidney Transplant Market Analysis: China is the leading market for kidney transplant in Asia and Middle East being followed by India. Japan stands at the 3rd position followed by South Korea. Australia and Iran are competing very closely with each other to capture the maximum market share.
