Abstracts

Self-monitoring of blood glucose (SMBG) is an important component of modern therapy for diabetes mellitus. SMBG has been recommended for people with diabetes and their health care professionals in order to achieve a specific level of glycemic control and to prevent hypoglycemia. Self-monitoring of blood glucose is a very lucrative business with enormous market opportunity. The primary growth factors for the SMBG market is the increasing global diabetic population; increasing awareness among the diabetes population, increasing spending on healthcare, active reimbursement policies and the technological advancement aimed at minimal and non-invasive testing methods.

Key Highlights

In 2015, Asian SMBG market was valued at nearly US\$ 2 Billion.

It is anticipated that the Asian SMBG users will cross the figure of 20 Million by 2021.

China dominates the self-monitoring of blood glucose users, with over XX percent users share in 2015.

Thailand and Malaysia are competing closely with each other to grab maximum share of the blood glucose users.

In Asia, China is the single largest market for SMBG followed by Australia and India.

Test Strips account for maximum share of the SMBG market.
