## Abstracts

The Global dental diagnostic and surgical equipment market is anticipated to grow at a CAGR of over 6% between 2017 and 2024. The dental diagnostics and surgical equipments are used for the analysis and cure of dental problems such as periodontitis, gingivitis, tooth decay, dental caries, other forms of oral cancers and injury. The global market for dental diagnostic and surgical equipments is expected to boost over the forecast period. Increasing incidence of dental diseases, rising demand for minimally invasive painless surgeries and technological advancement is expected to drive the dental diagnostics and surgical equipment market. Additionally, increasing geriatric population and growing demand for cosmetic dentistry fuels the market growth. Elder patients suffer from various dental disorders such as caries, oral candidiasis and xerostomia that thrust the dental diagnostic and surgical equipment market growth.
