Abstracts

The global hearing aids market is anticipated to grow at a CAGR of around 5% during the period 2017 - 2022. The growing prevalence of hearing impairment coupled with an expanding global geriatric population base and rapid technological advancement are three primary drivers of this market. While factors such as high cost of hearing aids, limited reimbursement and lack of awareness hinders the growth of the market.

The hearing aids market is segmented into hearing aid devices, hearing implants, OTC amplifiers and diagnostic instruments. The hearing aid devices segment accounts for the largest share of the market. The rapid technological advancements coupled with customization of the hearing devices and regulatory approvals will drive the growth of this market segment. The hearing implant segment captures the second largest share of the hearing aids market being followed by diagnostic instruments. OTC amplifiers captures least share of the hearing aids market.

Geographically, United States is the largest hearing aids market in the world accounting for around XX% share in 2016. United Kingdom is the second leading market for hearing aids. Germany is the third major market for hearing aids being followed by France. In emerging markets, China and India accounts for XX% and XX% share of the global hearing aids market respectively in 2016. Both India and China possess the most attractive healthcare market business because of being the world's most populated countries resulting in large patient pool. In 2016, Australia captured XX% share of the global hearing aids market, while Brazil and Canada both accounts for XXX% each share of the global hearing aids market.
