Abstracts

The influenza vaccine is one of the most lucrative segment of the global vaccines market. Influenza is a highly communicable disease and typically has the most severe impact on children and the elderly. Influenza viruses are considered as a major cause of morbidity and mortality worldwide. The vast population base together with significantly low vaccination coverage in emerging markets, rising government support for immunization and growing awareness of the value of influenza vaccine in preventing disease are the prominent factors that will fuel the growth of the influenza vaccines market.

In the influenza vaccines market, United States captures majority of the market share. Japan is the second leading market for influenza vaccines with around XX% share in 2015. China and India are the third and fourth leading market for influenza vaccines with XX% and XX% market share respectively in 2015. Brazil, Germany, France, UK, Italy, Spain and South Korea are the other leading market for influenza vaccines.

In the influenza vaccines brand sales segment, Sanofi's Fluzone holds the maximum share of the market being followed by Fluvirin/Flucelvax. GSK's Fluarix/FluLaval accounts for the third highest share of the influenza vaccines market. FluMist/Fluenz and Afluria/Fluvax stands at the fourth and fifth position in the influenza vaccines market, while Flublok has captured least share of the influenza vaccines market.

iGATE Research report titled "Influenza Vaccines Market and Forecast - Global Analysis" provides a comprehensive analysis of the fast-evolving influenza vaccines market. This 176 Page report contains 117 Figures and 8 Tables to present a clear picture of the influenza vaccines market landscape.
