Abstracts

The global 3D display market size reached US\$ 143.3 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 365.6 Billion by 2028, exhibiting a growth rate (CAGR) of 16.89% during 2022-2028. The increasing adoption of 3D display across numerous industries, advancements in computer technology, and the burgeoning gaming industry represent some of the key factors driving the market.

A 3D display is a technology that allows users to see and interact with images or videos in a three-dimensional space. It provides tools to visualize and understand complex high-dimensional data and objects and create the illusion of depth by presenting different images to each eye and creating a stereoscopic effect that mimics the way human vision works in the real world. It also facilitates an immersive and engaging viewing experience using digital light processing, plasma display panels, organic light-emitting diodes (OLEDs), and light-emitting diodes (LEDs). At present, it is widely employed in televisions, smartphones, monitors, mobile computing devices, and projectors.

3D Display Market Trends:

At present, the increasing adoption of 3D displays in various industries, such as gaming, healthcare, automotive, aerospace, and defense due to their ability to provide a more immersive and engaging experience represents one of the key factors positively influencing the market. In addition, ongoing advancements in 3D display technology, such as autostereoscopic displays, holographic displays, and volumetric displays, that offer improved content quality, in confluence with their increasing accessibility and rising affordability, are creating a favorable market outlook. Apart from this, the integration of advanced technology, such as virtual reality (VR) and augmented reality (AR), across various industry verticals are catalyzing the demand for 3D displays. Additionally, the rising usage of 3D displays by manufacturers for advertising and marketing for

increasing sales and brand awareness is propelling the growth of the market. Besides this, rise in the demand for 3D display technologies in home entertainment electronic devices, coupled with inflating disposable incomes and easy availability of devices, are bolstering the market growth. Apart from this, increasing advancements in computer technology and the rapid development of the gaming industry are fueling the market growth worldwide. Moreover, leading players are introducing innovative and cost-effective 3D display technologies that do not require continuous electricity. As these technologies are safe, reliable, and offer increased depth perception, they are gaining immense traction among doctors to perform surgeries. Furthermore, the increasing utilization of representational models, visuals, and movies in design, engineering, computer-aided design (CAD), computer-aided manufacturing (CAM), and simulation applications, along with the rising utilization of 3D display technologies in capturing and editing videos and photography, is stimulating the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global 3D display market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on type, technology, access method and application.

Type Insights:

Volumetric Display

Stereoscopic

Head Mounted Displays

The report has provided a detailed breakup and analysis of the 3D display market based on the type. This includes volumetric displays, stereoscopic, and head mounted displays. According to the report, stereoscopic represented the largest segment.

Technology Insights:

Digital Light Processing

Plasma Display Panel

Organic Light Emitting Diodes (OLEDs)

Light Emitting Diode (LEDs)

The report has provided a detailed breakup and analysis of the 3D display market based on the technology. This includes digital light processing, plasma display panel,

organic light emitting diodes (OLEDs), and light emitting diode (LEDs).

Access Method Insights:

Conventional/Screen Based Display
Micro Displays

A detailed breakup and analysis of the 3D display market based on the access method has also been provided in the report. This includes conventional/screen based display and micro displays. According to the report, conventional/screen based display accounted for the largest market share.

Application Insights:

Televisions
Smartphones
Monitors
Mobile Computing Devices
Projectors
Others

The report has provided a detailed breakup and analysis of the 3D display market based on the application. This includes televisions, smartphones, monitors, mobile computing devices, projectors, and others. According to the report, televisions accounted for the largest market share.

Regional Insights:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others

Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, Asia Pacific was the largest market for 3D display. Some of the factors driving the Asia Pacific 3D display market include significant growth in the entertainment and gaming industries, advancements in 3D technology, increasing adoption of 3D displays across numerous industries, etc.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global 3D display market. Competitive analysis such as market structure, market share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. Some of the companies covered include Dimenco B.V., Koninklijke Philips N.V., LG Display Co. Ltd., Mitsubishi Electric Corporation, Nikon Inc., Panasonic Corporation, Samsung Electronics Co. Ltd., Sharp Corporation, Sony Electronics Inc., The Coretec Group Inc, Toshiba Corporation, etc.

Key Questions Answered in This Report

1. How big is the global 3D display market?
2. What is the expected growth rate of the global 3D display market during 2023-2028?
3. What are the key factors driving the global 3D display market?
4. What has been the impact of COVID-19 on the global 3D display market?

5. What is the breakup of the global 3D display market based on the type?
6. What is the breakup of the global 3D display market based on the technology?
7. What is the breakup of the global 3D display market based on the access method?
8. What is the breakup of the global 3D display market based on the application?
9. What are the key regions in the global 3D display market?
10. Who are the key players/companies in the global 3D display market?
