Abstracts

The 7 major adamantinoma markets reached a value of US\$ 900 Million in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 1,400 Million by 2034, exhibiting a growth rate (CAGR) of 3.99% during 2024-2034.

The adamantinoma market has been comprehensively analyzed in IMARC's new report titled "Adamantinoma Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Adamantinoma is a rare, low-grade malignant bone tumor found in the diaphysis and metaphysis of long bones, commonly in 20- to 40-year-old individuals. This form of cancer is locally aggressive and has the potential to metastasize. The most common symptoms of adamantinoma comprise of pain (sharp or dull) at the tumor site, swelling and/or redness at the tumor site, limping, increased pain with activity or lifting, decreased movement of the affected limb, etc. The diagnosis of adamantinoma is performed via physical examination, magnetic resonance imaging (MRI), biopsy, bone scans, and blood and urine tests, among others. Currently, the main treatment options for adamantinoma include surgery, radiation therapy, and chemotherapy. Surgery is the most common treatment, and it is typically used to remove the tumor and surrounding tissue. Radiation therapy and chemotherapy are also adopted to treat adamantinoma, but they are usually utilized in combination with surgery.

The rising prevalence of rare bone tumors and the increasing frequency of reoccurrences of these ailments are primarily driving the global adamantinoma market. In addition to this, the widespread adoption of immunohistochemistry in order to assure the histological diagnosis of the disease is further bolstering the market growth. Correct diagnosis in the early stages of adamantinoma leads to resection with wide surgical

margins. Moreover, the emerging popularity of several treatment procedures, such as extensive resection and reconstruction of bone defects with the use of autograft, allograft, and bone transport, is also acting as a significant growth-inducing factor. Apart from this, the government bodies of numerous countries are investing in cancer research studies to develop advanced techniques to reduce the time taken for detecting and identifying tumors. This, coupled with the growing investments by pharmaceutical and biotechnology companies in R&D activities for developing novel therapies, are further positively influencing the market growth. Several other factors, including the escalating utilization of custom-made prostheses or endoprostheses to bridge the defect of the excised bone and the rising awareness regarding the associated benefits of biologics, are expected to drive the global adamantinoma market during the forecasted period.

IMARC Group's new report provides an exhaustive analysis of the adamantinoma market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for adamantinoma and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the adamantinoma market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom

Italy
Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario
Historical, current, and future performance of the adamantinoma market
Historical, current, and future performance of various therapeutic categories in the market
Sales of various drugs across the adamantinoma market
Reimbursement scenario in the market
In-market and pipeline drugs
Competitive Landscape:
This report also provides a detailed analysis of the current adamantinoma marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug overview
Mechanism of action
Regulatory status
Clinical trial results
Drug uptake and market performance

Late-Stage Pipeline Drugs

Drug overview
Mechanism of action
Regulatory status
Clinical trial results
Drug uptake and market performance
Key Questions Answered in this Report:
Market Insights

How has the adamantinoma market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the adamantinoma market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the adamantinoma market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of adamantinoma across the seven major markets?

What is the number of prevalent cases (2018-2034) of adamantinoma by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of adamantinoma by gender across the seven major markets?

What is the number of prevalent cases (2018-2034) of adamantinoma by type across the seven major markets?

How many patients are diagnosed (2018-2034) with adamantinoma across the seven major markets?

What is the size of the adamantinoma patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of adamantinoma?

What will be the growth rate of patients across the seven major markets?

Adamantinoma: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for adamantinoma drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the adamantinoma market?

What are the key regulatory events related to the adamantinoma market?

What is the structure of clinical trial landscape by status related to the adamantinoma

market?

What is the structure of clinical trial landscape by phase related to the adamantinoma market?

What is the structure of clinical trial landscape by route of administration related to the adamantinoma market?

 - 11.1.1.1 Drug Overview
 - 11.1.1.2 Mechanism of Action
 - 11.1.1.3 Regulatory Status
 - 11.1.1.4 Clinical Trial Results
 - 11.1.1.5 Sales Across Major Markets

Kindly note that the complete list of marketed drugs has been provided in the report.

12 ADAMANTINOMA - PIPELINE DRUGS

- 12.1 List of Adamantinoma Pipeline Drugs Across the Top 7 Markets
 - 12.1.1 Drug Name - Company Name
 - 12.1.1.1 Drug Overview
 - 12.1.1.2 Mechanism of Action
 - 12.1.1.3 Clinical Trial Results
 - 12.1.1.4 Safety and Efficacy
 - 12.1.1.5 Regulatory Status

Kindly note that the complete list of pipeline drugs has been provided in the report.

13. ADAMANTINOMA - ATTRIBUTE ANALYSIS OF KEY MARKETED AND PIPELINE DRUGS

14. ADAMANTINOMA – CLINICAL TRIAL LANDSCAPE

- 14.1 Drugs by Status
- 14.2 Drugs by Phase
- 14.3 Drugs by Route of Administration
- 14.4 Key Regulatory Events

15 ADAMANTINOMA - MARKET SCENARIO

- 15.1 Market Scenario - Key Insights
- 15.2 Market Scenario - Top 7 Markets
 - 15.2.1 Adamantinoma - Market Size
 - 15.2.1.1 Market Size (2018-2023)
 - 15.2.1.2 Market Forecast (2024-2034)
 - 15.2.2 Adamantinoma - Market Size by Therapies
 - 15.2.2.1 Market Size by Therapies (2018-2023)
