Abstracts

The global advanced suspension control system market size reached US\$ 16.1 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 32.3 Billion by 2032, exhibiting a growth rate (CAGR) of 7.8% during 2024-2032.

An advanced suspension control system refers to an automobile component that is designed to provide enhanced support to the vehicle body. It provides suspension to tires, through springs, shock absorbers and linkages, which connect the vehicle to the wheels and facilitates relative motion between the two. The system can decelerate the speed of the vehicle and minimize suspension deflection, which improves vehicle maneuverability by managing road-holding and ride quality. In comparison to the traditionally used suspension control systems, these advanced variants are more robust and can be used for compact and mid-size cars, along with light and heavy commercial vehicles.

Significant growth in the automotive industry and the increasing demand for lightweight and energy-efficient components, represent as the key factors creating a positive outlook for the market. Furthermore, the rising demand for semi-utility vehicles (SUVs)

and luxurious sports cars is also augmenting the market growth. Advanced suspension control systems can adapt to the vehicle's leveling and damping properties, which aid in improving the performance and overall safety and comfort for the driver. Additionally, various technological advancements, such as the development of suspension control systems with minimal tailpipe emissions, are acting as other growth-inducing factors. Product manufacturers are creating electronically controlled air suspension systems that are integrated with hydraulic and mechanical components for superior oil flow and control of spring and damping forces. Other factors, including improvements in the design and manufacturing techniques of suspension systems, along with extensive research and development (R&D) activities, are anticipated to drive the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global advanced suspension control system market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on system type, component, vehicle, vehicle type and sales channel.

Breakup by System Type:

Semi-Active Suspension System

Active Suspension System

Breakup by Component:

Springs

Shock Dampeners

Struts

Control Arms

Ball Joints

Others

Breakup by Vehicle:

Passenger Cars

Commercial Vehicles

Others

Breakup by Vehicle Type:

Conventional
Gasoline-Based
Diesel-Based
Hybrid
Electric

Breakup by Sales Channel:

OEMs
Aftermarket

Breakup by Region:

North America

Competitive Landscape:

The competitive landscape of the industry has also been examined with some of the key players being BWI Group, Continental AG, Hitachi Automotive Systems Ltd., Infineon Technologies AG, Lord Corporation, Marelli Europe S.P.A., Schaeffler AG, The Mando Corporation, ThyssenKrupp AG and ZF Friedrichshafen AG.

Key Questions Answered in This Report

1. What was the size of the global advanced suspension control system market in 2023?
2. What is the expected growth rate of the global advanced suspension control system market during 2024-2032?
3. What has been the impact of COVID-19 on the global advanced suspension control system market?
4. What are the key factors driving the global advanced suspension control system market?
5. What is the breakup of the global advanced suspension control system market based on the system type?
6. What is the breakup of the global advanced suspension control system market based on the component?
7. What is the breakup of the global advanced suspension control system market based on the vehicle?
8. What is the breakup of the global advanced suspension control system market based on the vehicle type?
9. What is the breakup of the global advanced suspension control system market based on the sales channel?
10. What are the key regions in the global advanced suspension control system market?
11. Who are the key players/companies in the global advanced suspension control system market?
