# **Abstracts**

The global aircraft line maintenance market size reached US\$ 21.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 32.6 Billion by 2032, exhibiting a growth rate (CAGR) of 4.7% during 2024-2032.

Aircraft line maintenance refers to various scheduled and unscheduled repairs, inspection and modifications that are aimed at maintaining the overall quality and performance of an aircraft. It also consists of services, such as component replacement and rigging, defect rectification and line station setup and management that aids in the timely resolution of technical defects. These activities are usually carried out when the aircraft is on the ground before takeoff and may or may not require servicing inside a hangar.

Significant growth in the aviation and defense industries is one of the key factors driving the growth of the market. Furthermore, with the increasing air traffic, there is a growing need for highly efficient flight safety mechanisms and security check-ups that can ensure maximum passenger safety. This, along with continual improvements in

commercial and other aviation aircraft, is providing a boost to the market growth. Various technological advancements, such as the integration of maintenance equipment with the Internet of Things (IoT), artificial intelligence (AI), machine learning (ML) and big data analytics, are acting as another major growth-inducing factor. IoT enabled systems facilitate accurate identification of defects, timely repairs, greater efficiency and less downtime for the aircraft fleets. Other factors, including rapid urbanization, extensive research and development activities (R&D) in the aviation industry, increasing construction of airports in emerging nations and the implementation of stringent government policies regarding passenger safety are projected to drive the market further.

IMARC Group's latest report provides a deep insight into the global aircraft line maintenance market covering all its essential aspects. This ranges from macro overview of the market to micro details of the industry performance, recent trends, key market drivers and challenges, SWOT analysis, Porter's five forces analysis, value chain analysis, etc. This report is a must-read for industry players, investors, researchers, consultants, business strategists, and all those who have any kind of stake or are planning to foray into the aircraft line maintenance industry in any manner.
