## Abstracts

The global aloe vera gel market reached a value of US\$ 243.6 Million in 2021. Looking forward, IMARC Group expects the market to reach US\$ 381.1 Million by 2027, exhibiting a CAGR of 7.56% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use industries. These insights are included in the report as a major market contributor.

Aloe vera contains polysaccharides in the gel or latex of its thick green leaves. The gel offers several therapeutic benefits based on the high content of amino acids, sugars, enzymes, hormones, vitamins, minerals, etc. Aloe vera gel is highly beneficial in treating oral problems, microbial growth, skin diseases, digestive ailments, and boosting immunity. As a result, it is widely used across several industries, including cosmetics, personal care, food and beverage, pharmaceutical, etc.

The aloe vera gel market is primarily driven by the increasing consumer health consciousness across the world. The high prevalence of skin-related diseases, obesity, cardiovascular disorders, diabetes, etc., is augmenting the product demand. Aloe vera gel has also been found to be beneficial in reducing inflammation, lowering the symptoms of acid reflux, decreasing cancer risks and treating hemorrhoids. The rising shift of consumers from chemical-based products towards herbal or organic ingredients is further driving the market growth. The increasing use of aloe vera gel in several personal grooming products, such as facial creams, moisturizers, anti-aging products, face wash, sunscreens, etc., is also catalyzing the product demand. Additionally, the rising popularity of aloe vera gel in the healthcare sector for treating mild wounds and reducing skin inflammations is further driving the market growth.
