Abstracts

The global ambulance services market size reached US\$ 49.6 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 81.9 Billion by 2028, exhibiting a growth rate (CAGR) of 8.89% during 2023-2028.

Ambulance, or paramedic, services refer to the emergency medical facilities used to transport patients that require immediate attention due to an illness or accidental injury. The ambulance services are ported to the site using specialized vehicles on the ground, air and water. These services are connected and integrated with communication and transportation networks, hospitals, trauma centers, specialty care centers and rehabilitation facilities to provide optimal care to the patients. They are used for both emergency and non-emergency situations and are integrated with tools for Basic Life Support (BLS) and Advanced Life Support (ALS) for the patients.

Ambulance Services Market Trends:

Significant growth in the healthcare industry across the globe is one of the key factors creating a positive outlook for the market. Furthermore, the increasing incidents of road accidents, natural calamities and medical ailments that require immediate medical attention are providing a thrust to the market growth. As the geriatric population continues to rise, the need for ambulance services is also increasing considerably for both unscheduled and irregular non-emergency and emergency situations. Additionally, the advent of multi-specialty ambulances that are equipped with innovative tools and equipment to provide prompt and high-quality care to the patients is acting as another major growth-inducing factor. Various healthcare centers are also adopting air ambulances to transport patients with infectious diseases and critical conditions with enhanced convenience, flexibility and safety for the patient. Other factors, including the

implementation of favorable government policies to promote public health, along with extensive improvements in the healthcare infrastructure, are anticipated to drive the market toward growth.
