Market Overview:

The global AMC CPU cards market size reached US\$ 575.1 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 885.6 Million by 2028, exhibiting a growth rate (CAGR) of 7.37% during 2023-2028. The increasing demand for high-performance computing, the widespread integration of various advanced technologies, such as AI, IoT, and ML, significant growth in the telecommunications industry, and enhanced focus on research and development (R&D) activities represent some of the key factors driving the market.

Advanced mezzanine card (AMC) central processing unit (CPU) cards are high-performance computing modules that are computer expansion cards used in telecommunications and other industries. AdvancedTCA and MicroTCA are some of the commonly used AMC CPU cards. They provide high-speed processing power and can be easily integrated into existing systems. AMC CPU cards are widely used in network processing and packet filtering, storage and data management, high-performance computing, image and video processing, and digital signal processing. They are cost-effective, scalable, interoperable, highly reliable, and resilient, ensuring that applications run smoothly and without interruption. As a result, AMC CPU cards are extensively used in communications and network infrastructure, healthcare, industrial automation and

control, military and aerospace, and transportation (including infotainment infrastructure).

AMC CPU cards Market Trends:

The increasing demand for high-performance computing is one of the key factors creating a positive outlook for the market. AMC CPU cards are widely used to deliver enhanced processing capabilities due to the increasing data-intensive workloads and advanced algorithms. In line with this, the widespread product adoption due to the changing trend towards modular and scalable computing architectures is favoring the market growth. Moreover, the increasing need for AMC CPU cards in the telecommunications industry to offer high-performance computing, packet processing, and network functions virtualization (NFV) is propelling the market growth. Apart from this, the rising adoption of cloud computing is driving the demand for more powerful computing solutions that can support cloud-based applications and services, which in turn is positively influencing the market growth. Furthermore, the increasing demand for robust computing solutions due to the integration of various new technologies, such as artificial intelligence (AI), machine learning (ML), and the Internet of Things (IoT), is providing a thrust to the market growth. Besides this, the widespread product adoption in embedded systems, which are extensively used in a variety of applications, including industrial automation, medical devices, and automotive systems, is acting as another growth-inducing factor. Other factors, including increasing adoption of AdvancedTCA, enhanced focus on research and development (R&D) activities, and the launch of miniaturized AMC CPU cards, are supporting the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global AMC CPU cards market, along with forecasts at the global, regional, and country levels from 2023-2028. Our report has categorized the market based on product type and application.

Product Type Insights:

AdvancedTCA

MicroTCA

The report has provided a detailed breakup and analysis of the AMC CPU cards market based on the product type. This includes advancedTCA and microTCA. According to the report, advancedTCA represented the largest segment.

Application Insights:

Communications and Network Infrastructure
Healthcare
Industrial Automation and Control
Military and Aerospace
Transportation (Including Infotainment Infrastructure)

A detailed breakup and analysis of the AMC CPU cards market based on the application has also been provided in the report. This includes communications and network infrastructure, healthcare, industrial automation and control, military and aerospace, and transportation (including infotainment infrastructure). According to the report, communications and network infrastructure accounted for the largest market share.

Regional Insights:

North America
United States
Canada
Asia Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America was the largest market for AMC CPU cards. Some of the factors driving the North America AMC CPU cards market included significant growth in the telecommunications industry, widespread adoption of Advanced CA, and rapid technological advancements.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global AMC CPU cards market. Detailed profiles of all major companies have also been provided. Some of the companies covered include Adax Inc., Extreme Engineering Solutions Inc, Kontron, Mercury Systems Inc., etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

How has the global AMC CPU cards market performed so far, and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global AMC CPU cards market?

What is the impact of each driver, restraint, and opportunity on the global AMC CPU cards market?

What are the key regional markets?

Which countries represent the most attractive AMC CPU cards market?

What is the breakup of the market based on the product type?

Which is the most attractive product type in the AMC CPU cards market?

What is the breakup of the market based on the application?

Which is the most attractive application in the AMC CPU cards market?

What is the competitive structure of the global AMC CPU cards market?

Who are the key players/companies in the global AMC CPU cards market?
