Market Overview:

The global animal wound care market size reached US\$ 1.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 1.7 Billion by 2028, exhibiting a growth rate (CAGR) of 6.2% during 2023-2028.

Animal wound care is a medical assistance given to animals by creating tissues with a similar structure at the site of injury to maintain their stability. It comprises stopping the bleeding, removing any foreign objects with tweezers, and cleaning, disinfecting and covering the wound with a bandage. It relies on sterile bandages, cleansing solutions, antibacterial ointments, bandage scissors, elastic wrapping, tweezers, spray bottles, and clean towels to treat wounds. It assists in washing away both visible and microscopic debris, which reduces the risk of infection among animals. As a result, it finds extensive applications in hospitals, clinics, and home care across the globe.

Animal Wound Care Market Trends:

Due to the increasing adoption of pets among individuals to relieve anxiety and reduce the effects of social isolation, there is a rise in the demand for animal wound care. This, along with the growing demand for veterinary surgeries, represents one of the key factors driving the market. In addition, there is a rise in the number of vet visits to cure and diagnose infection for better health of animals and prevent diseases that are transferable from animals to humans. This, coupled with increasing enhancements in animal wound care products, is propelling the growth of the market. Moreover, favorable regulations implemented by governments of several countries to support better care and treatment of animals are catalyzing the demand for animal wound care. In line with this,

the growing demand for animal protein is positively influencing the market. Besides this, key market players are investing in research and development (R&D) activities to launch new animal care products. Apart from this, the rising awareness among the masses about animal health and welfare is offering lucrative growth opportunities to industry investors.
