Abstracts

The global aortic valve replacement market size reached US\$ 9.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 17.7 Billion by 2028, exhibiting a growth rate (CAGR) of 11.7% during 2022-2028. The increasing prevalence of aortic diseases, rising implementation of health insurance policies, and the growing adoption of MIS procedures represent some of the key factors driving the market. Aortic valve replacement is a surgical procedure performed to replace a diseased or damaged aortic valve in the heart. It is usually operated through the traditional open-heart surgery, which involves incising the chest or using minimally invasive (MI) methods that require smaller incisions in the chest or a catheter incorporated in the leg. It treats diseases that affect the valves and controls blood flow through the heart. It aids in restoring normal blood flow, reducing symptoms, prolonging life, and preserving the function of the heart muscle. It is generally recommended for patients with severe aortic valve disease, including aortic stenosis or aortic regurgitation, that has symptoms like chest pain, shortness of breath, and fatigue.

Aortic Valve Replacement Market Trends:

The surging prevalence of aortic diseases among the masses and the increasing aging population that is more prone to developing these medical disorders represent one of the major factors driving the demand for aortic valve replacement around the world. Moreover, the rising implementation of health insurance policies that offer financial assistance for aortic valve replacement and reduce medical expenses is favoring the growth of the market. In addition, the growing awareness about aortic diseases, their symptoms, diagnosis, and the easy availability of the treatment options like aortic valve

replacement is influencing the market positively. Apart from this, there is an increase in the adoption of transcatheter aortic valve replacement (TAVR), minimally invasive surgical (MIS) procedure that helps replace the aortic valve without open-heart surgery and is generally preferred by patients who are at major risk for traditional open-heart surgery. This, coupled with the rising preferences for MIS procedures on account of fewer operative complications, shorter hospitalization, less pain, reduced postoperative care, quicker recovery, and lower risk of infection, is propelling the growth of the market. Furthermore, the integration of artificial intelligence (AI) and machine learning (ML) in imaging techniques of aortic valve replacement to identify patients who are at higher risk for complications and optimize the procedure and postoperative care is contributing to the market growth. Besides this, governing agencies of numerous countries are undertaking measures to offer quality healthcare facilities that are accessible to all. This, along with significant improvements in the diagnostic technologies, is strengthening the growth of the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global aortic valve replacement market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on surgery, product and end use.

Surgery Insights:

Open Surgery

Minimally Invasive Surgery

The report has provided a detailed breakup and analysis of the aortic valve replacement market based on the surgery. This includes open surgery and minimally invasive surgery. According to the report, minimally invasive surgery represented the largest segment.

Product Insights:

Transcatheter Aortic Valve

Sutureless Valve

Others

A detailed breakup and analysis of the aortic valve replacement market based on the product has also been provided in the report. This includes transcatheter aortic valve, sutureless valve, and others. According to the report, transcatheter aortic valve accounted for the largest market share.

End Use Insights:

Hospitals

Ambulatory Surgery Centers

Others

The report has provided a detailed breakup and analysis of the aortic valve replacement

market based on the end use. This includes hospitals, ambulatory surgery centers, and others. According to the report, hospitals represented the largest segment.

Regional Insights:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America (the United States and Canada) was the largest market for aortic valve replacement. Some of the factors driving the North America aortic valve replacement market included extensive research and development (R&D) activities, well established healthcare facilities, integration of advanced technologies, etc.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global aortic valve replacement market. Competitive analysis such as market

structure, market share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. Some of the companies covered include Abbott Laboratories, Anteris Technologies Ltd., Boston Scientific Corporation, Coroneo Inc., CryoLife Inc., Edward Lifesciences Corporation, JenaValve Technology Inc., LifeNet Health Inc., LivaNova PLC, Medtronic plc, Thubrikar Aortic Valve Inc., etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report

1. What was the size of the global aortic valve replacement market in 2022?
2. What is the expected growth rate of the global aortic valve replacement market during 2023-2028?
3. What are the key factors driving the global aortic valve replacement market?
4. What has been the impact of COVID-19 on the global aortic valve replacement market?
5. What is the breakup of the global aortic valve replacement market based on the surgery?
6. What is the breakup of the global aortic valve replacement market based on the product?
7. What is the breakup of the global aortic valve replacement market based on the end use?
8. What are the key regions in the global aortic valve replacement market?
9. Who are the key players/companies in the global aortic valve replacement market?
