Abstracts

The global application infrastructure middleware market size reached US\$ 52.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 89.7 Billion by 2028, exhibiting a growth rate (CAGR) of 9.48% during 2022-2028.

Application infrastructure middleware (AIM) is a software-based solution used for mediating between networked operating systems and applications. It is usually set up between the operating systems and applications operating on multiple servers. B2B middleware, enterprise service bus, message-oriented middleware, transaction processing monitors and business process management are some of the commonly used AIM solutions. They are deployed through public, hybrid or private cloud computing platforms for cloud integration of existing and new applications. They can be further integrated with message-oriented middleware (MOM), remote procedure call (RPC) and database, transactional, device, portal and robotics middleware. As a result, AIM finds extensive applications across various industries, including banking, financial services and insurance (BFSI), information technology (IT), telecommunication and healthcare.

Application Infrastructure Middleware Market Trends:

The increasing adoption of cloud computing services across industries is one of the key factors driving the growth of the market. AIM solutions are deployed in organizations to convert existing and complex applications into Software-as-a-Service (SaaS) solutions. Moreover, the widespread utilization of the Internet of Things (IoT)-enabled devices is providing a thrust to the market growth. It aids in migrating and rebuilding mission-critical customer-centric applications and assets with improved integration and orchestration. AIM also offers enhanced enterprise mobility, data security and

management of remote devices and databases, which is also contributing to the growth of the market. Additionally, as the coronavirus disease (COVID-19) continues to spread across the globe, there has been a significant increase in the requirement of AIM solutions for operating application programming interfaces (APIs) and other digital and distributed infrastructures. Other factors, including the increasing deployment of wireless 5G networks, along with significant improvements in the information technology (IT) infrastructure, are anticipated to drive the market toward growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global application infrastructure middleware market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on type, component, organization size and end use industry.

Breakup by Type:

- Server-based
- Client-based

Breakup by Component:

- Software
- Services

Breakup by Organization Size:

- Small and Medium Enterprises
- Large Enterprises

Breakup by End Use Industry:

- BFSI
- IT and Telecommunication
- Healthcare
- Retail
- Government
- Others

Breakup by Region:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Cisco Systems Inc., Fujitsu Limited, International Business Machines Corporation, Informatica LLC, Microsoft Corporation, Oracle Corporation, Salesforce.com Inc., SAP SE, Software AG, TIBCO Software Inc. and Unisys Corporation.

Key Questions Answered in This Report

1. What was the size of the global application infrastructure middleware market in 2022?
2. What is the expected growth rate of the global application infrastructure middleware market during 2023-2028?
3. What are the key factors driving the global application infrastructure middleware

market?

4. What has been the impact of COVID-19 on the global application infrastructure middleware market?
5. What is the breakup of the global application infrastructure middleware market based on the type?
6. What is the breakup of the global application infrastructure middleware market based on the component?
7. What is the breakup of the global application infrastructure middleware market based on the organization size?
8. What is the breakup of the global application infrastructure middleware market based on the end use industry?
9. What are the key regions in the global application infrastructure middleware market?
10. Who are the key players/companies in the global application infrastructure middleware market?
