The global automotive brake system market size reached US\$ 49.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 73.9 Billion by 2032, exhibiting a growth rate (CAGR) of 4.47% during 2024-2032.

An automotive brake system is a mechanical control device designed to restrain the motion of vehicles and ensure the safety of passengers. It comprises various components, including a brake pedal, disc, shoes, rotor, pads, drum, calipers, fluid lines, hoses, and master cylinder. It helps slow down or stop the motion of an automobile by absorbing energy from a moving system, usually by friction between two surfaces. Besides this, it also assists drivers in the stable parking of a vehicle either on a flat surface or slope.

Automotive Brake System Market Trends:

The growing global population is resulting in the increasing sales of passenger and

commercial vehicles. This represents one of the key factors strengthening the growth of the market. In addition, rising occurrences of road accidents across the globe are catalyzing the demand for automotive brake systems. The rising concerns among individuals about road traffic collisions and fatalities are also compelling automotive manufacturers to incorporate robust safety systems in vehicles, which is impelling the market growth. Apart from this, stringent regulations imposed by governments and regulatory organizations of various countries to control road accidents are creating a positive outlook for the market. Furthermore, various technological innovations, such as anti-lock braking systems (ABS) and regenerative braking, is supporting the market growth. These advanced braking systems assist drivers in having maximum control and shorter stopping distances on slippery surfaces that aid in reducing the chances of vehicle collisions. Additionally, the new car assessment program (NCAP) to promote the usage of electronic brake systems is driving the market. Moreover, the increasing adoption of electric cars and the growing production of autonomous vehicles are expected to propel market growth.
