The global automotive display system market size reached US\$ 14.5 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 25.1 Billion by 2028, exhibiting a growth rate (CAGR) of 9.4% during 2023-2028.

An automotive display system is an in-vehicle device that provides vital information to the driver. It is installed on the dashboard of the vehicle and assists in minimizing the complexity faced by the driver while driving. It offers information, including navigation directions, parking assistance, security services, speed, distance traveled, and time. It is utilized in commercial and passenger vehicles to improve the comfort, safety, and entertainment of the users. It is commonly available in the head-up, instrument cluster, center stack, entertainment, and mirror display variants.

Automotive Display System Market Trends:

At present, considerable growth in the automotive sector and increasing sales of luxury

vehicles on account of rapid urbanization and inflating income levels are among the key factors fueling the growth of the market around the world. Moreover, the growing number of fatal road accidents is positively influencing the demand for automotive display systems to support driver and passenger safety. In addition, key players are incorporating augmented reality (AR) and offering a larger area for visuals in automotive display systems to provide a safer driving experience, which is contributing to the market growth. Apart from this, initiatives undertaken by governments of numerous countries to spread awareness about the benefits of using these systems in vehicles are impelling the growth of the market. Furthermore, several automobile companies are launching automotive display systems in mid-range vehicle models to reach the mid and low-income consumer base, which is creating a positive outlook for the market. Besides this, continuous product innovations and extensive investments in research and development (R&D) projects conducted by key players are expected to strengthen the growth of the market in the coming years.
