## **Abstracts**

The global automotive door handles market size reached US\$ 4.42 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 5.84 Billion by 2028, exhibiting a growth rate (CAGR) of 5.00% during 2023-2028. The increasing demand for passenger vehicles, growing investments in research and development, and technological advancements in the automotive industry represent some of the key factors driving the market.

Automotive door handles are mechanical devices used to open and close vehicle doors. They are typically located on the exterior of the vehicle, at the front and rear of each door. Door handles come in various shapes and sizes however, the most common type is a lever or a pull-style handle that is used to open the door. Modern automotive door handles are designed to be both functional and aesthetically pleasing. They are often made of durable materials such as plastic, metal, or a combination of both. Some high-end vehicles even feature door handles made of materials like carbon fiber or aluminum. In addition to their basic function of opening and closing the door, numerous automotive door handles possess features, such as keyless entry, allowing the driver to unlock the doors with a remote fob or a smartphone app. Some door handles also incorporate buttons or sensors that allow for hands-free operation or automatic opening and closing of the doors.

### Automotive Door Handles Market Trends:

One of the primary factors driving the market is the increasing demand for passenger vehicles worldwide due to rising disposable income, rapid urbanization, and changing lifestyles. Other than this, key players are focusing on introducing lightweight door handles that are made of advanced materials, such as carbon fiber, aluminum and magnesium, to reduce the weight of vehicles and enhance fuel efficiency and reduce emissions. Besides this, with the growing preference for customized vehicles that reflect individual's personalities and styles, automotive manufacturers are offering a wide range of door handles that are available in different colors, finishes, and designs. In line with this, the demand for luxury cars is constantly rising, which is propelling the automotive door handles market, as these cars are equipped with high-end door handles that are produced from premium materials and feature advanced functionalities. Apart from these factors, significant technological advancements in the automotive industry are also strengthening the market growth. Moreover, the advent of electric vehicles and autonomous driving technology has prompted automotive manufacturers to develop door handles that are more compatible with these emerging technologies. For instance, various key players are integrating door handles with sensors that can detect when a passenger is approaching the car, and automatically unlock the doors. Furthermore, automotive manufacturers are investing heavily in research and development (R&D) activities to develop advanced door handles that are more durable, safer, and aesthetically pleasing. This has led to the introduction of innovative products, such as keyless entry systems, sensors, and biometric systems, that are making vehicles more secure and convenient to use. Moreover, stringent safety regulations imposed by governments worldwide, such as mandating the use of safety features in cars, including high-quality door handles that can withstand impacts and prevent occupants from being ejected from the car during a collision, are expected to increase the demand for advanced door handles, which comply with safety standards.

### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global automotive door handles market, along with forecasts at the global, regional, and country levels from 2023-2028. Our report has categorized the market based on the type, handle type, vehicle type, and sales channel.

### Type Insights:

Exterior Door Handles

Interior Door Handles

The report has provided a detailed breakup and analysis of the automotive door handles market based on the type. This includes exterior door handles and interior door handles.

#### Handle Type Insights:

Mechanical

Automatic

A detailed breakup and analysis of the automotive door handles market based on the handles type has also been provided in the report. This includes mechanical and automatic. According to the report, mechanical accounted for the largest market share.

#### Vehicle Type Insights:

Passenger Vehicles

Commercial Vehicles

The report has provided a detailed breakup and analysis of the automotive door handles market based on the vehicle type. This includes passenger vehicles and commercial vehicles. According to the report, passenger vehicles represented the largest segment.

#### Sales Channel Insights:

Original Equipment Manufacturer (OEM)

Aftermarket

A detailed breakup and analysis of the automotive door handles market based on the sales channel has also been provided in the report. This includes original equipment manufacturer (OEM) and aftermarket. According to the report, original equipment manufacturer (OEM) accounted for the largest market share.
