The global battery case market size reached US\$ 6.71 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 12.82 Billion by 2028, exhibiting a growth rate (CAGR) of 11.0% during 2023-2028. The growing use of mobile devices, rising traction of energy-intensive activities, and easy product availability via e-commerce channels represent some of the key factors driving the market.

A battery case is a protective device that encloses a portable electronic device, such as a smartphone or tablet, to provide additional power. It has an in-built battery that can be used to charge the device. It is made using various materials, such as plastic, rubber, and metal, through injection molding. It assists in extending the battery life, protecting from physical damage, and allowing the device to be used for a longer period without access to an electrical outlet. Nowadays, product manufacturers are introducing novel variants with multiple charging ports that enable users to charge different devices simultaneously. They are also using heat dissipation technology in a battery case to prevent the device from overheating while charging.

Battery Case Market Trends:

At present, there is a considerable increase in the adoption of renewable energy sources, such as solar panels. This, coupled with the surging electricity needs and generation on account of rapid urbanization, represents one of the key factors driving the demand for battery storage solutions like battery cases to minimize the impact of power outages. Moreover, the rising use of mobile devices, such as smartphones and tablets, is favoring the market growth. In addition, the growing traction of energy-intensive activities, including gaming and streaming video content, is influencing the sales of battery cases that help extend the battery life of a device. Apart from this, there

is an increase in the utilization of battery cases in outdoor and remote locations for charging devices. Furthermore, the rising sales of smartwatches, speakers, portable blenders, and coffee frothers are propelling the growth of the market. Besides this, the growing product adoption among technologically advanced users on account of their portability, durability, fast charging, cost-effectiveness, and multiple ports is creating a positive outlook for the market. Additionally, rapid urbanization, busy lifestyles, and the expanding purchasing power of consumers are driving the sales of battery cases via online retail channels, which offer easy availability and convenience. This, along with the thriving e-commerce sector and the increasing penetration of high-speed internet connectivity, is projected to strengthen the growth of the market in the future.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global battery case market, along with forecasts at the global, regional, and country level from 2023-2028. Our report has categorized the market based on price range and distribution channel.

Price Range Insights:

Low

Medium

Premium

The report has provided a detailed breakup and analysis of the battery case market based on the price range. This includes low, medium, and premium. According to the report, medium represented the largest segment.

Distribution Channel Insights:

Online

Offline

A detailed breakup and analysis of the battery case market based on the distribution channel has also been provided in the report. This includes online and offline. According to the report, online accounted for the largest market share.

Regional Insights:

North America

United States
Canada
Asia Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets that include North America (the United States and Canada), Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others), Europe (Germany, France, United Kingdom, Italy, Spain, Russia, and others), Latin America (Brazil, Mexico, and others), and the Middle East and Africa. According to the report, North America was the largest market for battery case. Some of the factors driving the North America battery case market included the increasing use of smartphones, rising adoption of renewable energy sources, the easy availability of technologically advanced product variants, etc.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global battery case market. Detailed profiles of all major companies have also been provided. Some of the companies covered include Alpatronix, Apple Inc., Maxboost, PhoneSuit, ZeroLemon, etc. Kindly note that this only represents a partial list of

companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

How has the global battery case market performed so far and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global battery case market?

What are the key regional markets?

Which countries represent the most attractive battery case markets?

What is the breakup of the market based on the price range?

What is the breakup of the market based on the distribution channel?

What is the competitive structure of the global battery case market?

Who are the key players/companies in the global battery case market?
