## Abstracts

The 7 major Behcet's syndrome markets reached a value of US\$ 99.9 Million in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 174.5 Million by 2034, exhibiting a growth rate (CAGR) of 5.2% during 2024-2034.

The Behcet's syndrome market has been comprehensively analyzed in IMARC's new report titled "Behcet's Syndrome Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Behcet's syndrome, also known as Behcet's disease, refers to a chronic, remitting, and relapsing inflammatory disorder caused by blood vessel inflammation. It affects several parts of the body, such as the mouth, eyes, genital areas, stomach, skin, eyes, joints, etc. Various symptoms of Behcet's disease include mouth sores, inflammation in the eyes, genital sores, arthritis, ulcers, etc. The diagnosis is usually carried out by assessing the symptoms, including how often (typically at least three times a year) the oral form of ulcers can come back. Furthermore, a positive pathergy test, which analyzes the functionality of the immune system, is performed by pricking the skin area and then assessing whether red bumps develop a few days after the test, thereby indicating Behcet's disease. In order to carry out the proper form of diagnosis, other illnesses that tend to produce mouth sores and closely resemble Behcet syndrome must be exempted.

The increasing prevalence of rare genetic inflammatory disorders coupled with the escalating demand for novel medications that can treat the conditions effectively is primarily driving the Behcet's syndrome market. In addition to this, the widespread adoption of corticosteroid-containing preparations to suppress inflammation and reduce the frequency and severity of recurrences is also bolstering the market growth.

Moreover, several key players are focusing on the pathogenesis of the disease for the development of effective therapeutic options that improve outcomes and prevent irreversible organ damage. This, in turn, is further creating a positive outlook for the market. Additionally, the emerging popularity of personalized treatment approaches for treating the disease, depending on the organ/s involved, the severity and duration of involvement, the frequency of attacks, gender, and the patient's age, is also acting as a significant growth-inducing factor. Besides this, the increasing utilization of biological therapies since they assist in improving patient prognosis and survival is further propelling the market growth. They provide better effectiveness while enabling more focused immune modulation. Moreover, the introduction of favorable guidelines by numerous regulatory bodies to support faster approvals of pipeline drugs and clinical trials that encourage the entry of new medications is expected to drive the Behcet's syndrome market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the Behcet's syndrome market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report, the United States has the largest patient pool for Behcet's syndrome and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the Behcet's syndrome market in any manner.

#### Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

#### Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain

Japan

### Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the Behcet's syndrome market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the Behcet's syndrome market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current Behcet's syndrome marketed drugs and late-stage pipeline drugs.

### In-Market Drugs

Drug overview

Mechanism of action

Regulatory status

Clinical trial results

Drug uptake and market performance

### Late-Stage Pipeline Drugs

Drug overview

Mechanism of action

Regulatory status

Clinical trial results

Drug uptake and market performance

\*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report.

Key Questions Answered in this Report:

Market Insights

How has the Behcet's syndrome market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the Behcet's syndrome market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the Behcet's syndrome market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

### Epidemiology Insights

What is the size of the Behcet's syndrome patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of Behcet's syndrome?

What will be the growth rate of patients across the seven major markets?

### Behcet's Syndrome: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for Behcet's syndrome drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the Behcet's syndrome market?
