Abstracts

The global breath analyzer market size reached US\$ 4.0 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 23.5 Billion by 2032, exhibiting a growth rate (CAGR) of 20.8% during 2024-2032.

The breath analyzer is a hand-held medical device that is primarily used for onsite detection of alcohol or drug content in the blood through the exhaled breath. The analyzer operates by passing the exhaled breath through a solution of sulfuric acid and potassium dichromate. The solution changes color in proportion to the amount of the alcohol in the air sample, thereby depicting the alcohol content in the blood. It is a convenient and efficient tool that provides immediate and accurate results that is also used for the diagnosis of tuberculosis, asthma and other respiratory diseases.

Breath Analyzer Market Trends:

Increasing alcohol consumption, along with the rising instances of road accidents caused by the influence of alcohol and other drugs, represent as the key factors driving the growth of the market. In line with this, governments of various nations across the globe are implementing stringent regulations against drunk driving. Breath analyzers are extensively utilized by law enforcement agencies for the detection of alcohol in the breath and improving road traffic safety. Various non-governmental organizations (NGOs) are also undertaking crucial steps and campaigning actively to raise awareness

regarding substance abuse and the adverse effects of excessive alcohol consumption.

The rising demand for effective diagnosis of cancer and other diseases, including asthma and chronic obstructive pulmonary disease (COPD), is also providing a boost to the breath analyzer market growth. The device is widely used as a tool for smoking cessation and monitoring the levels of carbon monoxide (CO) in the exhaled breath. Other factors, including various technological advancements, such as the development of product variants that can be connected to Bluetooth for personal tracking, and analyzers equipped with fuel cell and semiconductor sensor technologies to provide more accurate results, are projected to drive the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global breath analyzer market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on technology, application and end-user.

Breakup by Technology:

- Fuel Cell Technology
- Semiconductor Sensor
- Infrared Spectroscopy
- Others

Breakup by Application:

- Alcohol Detection
- Drug Abuse Detection
- Medical Application

Breakup by End-User:

- Law Enforcement Agencies
- Enterprises
- Others

Breakup by Region:

North America

United States

Canada

Asia Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined with some of the key players being AK Globaltech Corp., Akers Biosciences Inc., Alcohol Countermeasure Systems (International) Inc., BACtrack Inc., Drägerwerk AG & Co. KGaA, EnviteC-Wismar GmbH, Intoximeters Inc., Lifeloc Technologies, Mpd Inc., Quest Products LLC., etc.

Key Questions Answered in This Report

1. What was the size of the global breath analyzer market in 2023?
2. What is the expected growth rate of the global breath analyzer market during 2024-2032?
3. What has been the impact of COVID-19 on the global breath analyzer market?

4. What are the key factors driving the global breath analyzer market?
5. What is the breakup of the global breath analyzer market based on the technology?
6. What is the breakup of the global breath analyzer market based on the application?
7. What is the breakup of the global breath analyzer market based on the end-user?
8. What are the key regions in the global breath analyzer market?
9. Who are the key players/companies in the global breath analyzer market?
