### Market Overview 2023-2028:

The global carbon fiber prepreg market size reached US\$ 9.7 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 15.8 Billion by 2028, exhibiting a growth rate (CAGR) of 8.43% during 2023-2028.

Carbon fiber prepreg refers to a carbon fiber that has been pre-impregnated with catalyzed resins. It is manufactured using thermoset resins, such as epoxy, polyimide, phenols and thermoplastics, through hot melt and solvent dip techniques. These fibers are led through a comb and laid on a carrier paper for lamination with the resin content, which is further covered with another layer of carrier paper. It exhibits high operational strength, stability and resistance to corrosion, fatigue, fire, moisture and chemicals. It is also highly cost-effective and environment-friendly and finds extensive applications across various such as aerospace, defense, automotive, wind energy, sports and recreation, medical, construction, etc.

### Carbon Fiber Prepreg Market Trends:

Rapid industrialization, along with increasing adoption of green energy sources, is one of the key factors driving the growth of the market. Furthermore, the steady expansion of the automotive industry is also providing a boost to the market growth. Carbon prepreps are increasingly replacing metals in the production of various automobile components, such as bumpers, fenders, splitters, wheel archers, brake ducts and vents. Additionally, widespread product adoption for the manufacturing of various aerospace equipment is also favoring the market growth. Owing to the several associated benefits, such as high physical strength and structural performance with minimal weight, carbon

prepregs are used in the production of cabin linings, air ducts, plenums, bars, seats, partitions, trailing edges and brackets. They are also utilized for manufacturing various sports accessories, such as tennis rackets, bicycles, fishing rods and golf shafts. Other factors, including multiple product innovations and extensive research and development (R&D) activities, are expected to drive the market further.
