Abstracts

The global cardiac pacemaker market size reached US\$ 5.0 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 6.8 Billion by 2032, exhibiting a growth rate (CAGR) of 3.5% during 2024-2032. The increasing prevalence of CVDs, rising number of people with health insurance policies, and extensive research and development (R&D) activities for improving surgical techniques represent some of the key factors driving the market.

A cardiac pacemaker is a small medical device implanted in the chest or abdomen to treat heart rhythm disorders using electrical pulses, which assist in regulating and monitoring the heartbeat. It has electronic and mechanical components, such as microprocessors, sensors, electrodes, wires, leads, and housing, and can be customized according to the requirements of the patient. It helps reduce the risk of complications like stroke and heart failure that can be caused by an irregular or slow heart rate. Besides this, a cardiac pacemaker is incorporated into implantable defibrillators and cardiac resynchronization therapy devices to offer a more comprehensive treatment approach. At present, key players are introducing small and less invasive cardiac pacemakers to make it easier for patients to tolerate and surgeons to implant.

Cardiac Pacemaker Market Trends:

The surging prevalence of cardiovascular diseases (CVDs) among the masses represents one of the major factors driving the demand for cardiac pacemakers around the world. Moreover, the rising aging population, which is more prone to ailments, such as arrhythmias, congenital heart disease, and atrial fibrillation, is favoring the market growth. In addition, the growing health consciousness and awareness about the available treatment alternatives for heart-related ailments are influencing the market positively. Apart from this, the increasing number of people with health insurance policies that provide financial assistance for cardiac pacemakers and reduce medical expenses is contributing to the market growth. Furthermore, leading players are launching cardiac pacemakers with longer battery life and remote monitoring capabilities that allow healthcare professionals to track the performance of the device and heart function of patients remotely using a smartphone. Key players are also focusing on using biocompatible materials in the manufacturing of cardiac pacemakers to minimize the risk of infection and other complications associated with pacemaker implantation. Besides this, the integration of wireless technology in cardiac pacemakers to transmit data to and from the device that can help improve the accuracy and reliability of the device is propelling the growth of the market. Additionally, governing agencies of numerous countries are investing in research and development (R&D) activities to improve surgical techniques and provide easy access to healthcare facilities.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global cardiac pacemaker market, along with forecasts at the global, regional, and country levels from 2024-2032. Our report has categorized the market based on type, technology, indication, and end user.

Type Insights:

Implantable

External

The report has provided a detailed breakup and analysis of the cardiac pacemaker market based on the type. This includes implantable and external. According to the report, implantable represented the largest segment.

Technology Insights:

Biventricular

Single Chambered

Dual Chambered
Others

A detailed breakup and analysis of the cardiac pacemaker market based on the technology has also been provided in the report. This includes biventricular, single chambered, dual chambered, and others. According to the report, dual chambered accounted for the largest market share.

Indication Insights:

Arrhythmias
Congestive Heart Failure
Others

The report has provided a detailed breakup and analysis of the cardiac pacemaker market based on the indication. This includes arrhythmias, congestive heart failure, and others. According to the report, arrhythmias represented the largest segment.

End User Insights:

Hospitals and Clinics
Ambulatory Surgery Centers
Others

A detailed breakup and analysis of the cardiac pacemaker market based on the end user has also been provided in the report. This includes hospitals and clinics, ambulatory surgery centers, and others. According to the report, hospitals and clinics accounted for the largest market share.

Regional Insights:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea

Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets that include North America (the United States and Canada), Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others), Europe (Germany, France, United Kingdom, Italy, Spain, Russia, and others), Latin America (Brazil, Mexico, and others), and the Middle East and Africa. According to the report, North America was the largest market for cardiac pacemaker. Some of the factors driving the North America cardiac pacemaker market included the growing incidences of cardiac disorders, rising geriatric population, the launch of MRI-compatible pacemakers and Bluetooth-enabled pacemakers, etc.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global cardiac pacemaker market. Detailed profiles of all major companies have also been provided. Some of the companies covered include Abbott Laboratories, Biotronik, Boston Scientific Corporation, Lepu Medical Technology (Beijing)Co. Ltd., MEDICO s.r.l., Medtronic plc, MicroPort Scientific Corporation, Oscor Inc. (Integer Holdings Corporation), Osypka Medical GmbH., Shree Pacetronix Ltd., etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report

1. How big is the global cardiac pacemaker market?
2. What is the expected growth rate of the global cardiac pacemaker market during 2024-2032?
3. What are the key factors driving the global cardiac pacemaker market?
4. What has been the impact of COVID-19 on the global cardiac pacemaker market?
5. What is the breakup of the global cardiac pacemaker market based on the type?
6. What is the breakup of the global cardiac pacemaker market based on the technology?
7. What is the breakup of the global cardiac pacemaker market based on the indication?
8. What is the breakup of the global cardiac pacemaker market based on the end user?
9. What are the key regions in the global cardiac pacemaker market?
10. Who are the key players/companies in the global cardiac pacemaker market?
