Market Overview:

The global cleanroom consumables market size reached US\$ 4.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 5.6 Billion by 2028, exhibiting a growth rate (CAGR) of 5.1% during 2023-2028.

Cleanroom consumables are made using high-quality raw materials and are worn in cleanrooms that have a controlled environment with low impurities, such as dust, microorganisms and chemical vapors. They protect products and processes from contamination caused by the individuals working in cleanrooms and their garments. They are washable, reusable, lightweight, skin-friendly and shrink resistant. Moreover, cleanroom consumables are available in different sizes, fabrics and colors to meet the requirements of different clients. They are widely used in hospitals, medical colleges, research laboratories, and pharmaceutical and chemical industries worldwide.

Cleanroom Consumables Market Trends:

In recent years, the need for improved quality and safety of healthcare products has emerged as one of the key factors fueling the demand for cleanroom consumables across the globe. Besides this, governments of several countries are implementing favorable regulations for the utilization of cleanroom consumables in the healthcare sector. This, in confluence with the escalating demand for sterilized pharmaceutical formulations and significant developments in medical equipment, is facilitating the market growth. Furthermore, the sudden outbreak of the coronavirus disease (COVID-19) has accelerated the demand for cleanroom consumables, such as goggles,

gloves, and gowns, which is offering lucrative opportunities to the leading players. Apart from this, key players are engaged in regulatory approvals, training and development, acquisition and collaborative agreements with other companies. They are also increasing research and development (R&D) activities to introduce new products, which is anticipated to impel the market growth.
