Abstracts

The 7 major coagulation protein disorders markets are expected to exhibit a CAGR of 7.6% during 2024-2034.

The coagulation protein disorders market has been comprehensively analyzed in IMARC's new report titled "Coagulation Protein Disorders Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Coagulation protein disorders are a group of medical conditions characterized by abnormalities in the blood clotting process. This can result in prolonged bleeding and difficulty forming stable blood clots, leading to excessive and potentially life-threatening bleeding after even minor injuries or surgeries. The symptoms of these ailments often include easy bruising, frequent nosebleeds, heavy or prolonged menstrual bleeding in females, and persistent bleeding after dental procedures. In more severe cases, spontaneous joint or muscle bleeding can occur, leading to pain and swelling. Individuals suffering from these conditions may also experience gastrointestinal bleeding and blood in their urine. The diagnosis of coagulation protein disorders typically involves a combination of medical history assessment, family history evaluation, and specialized laboratory tests. These investigations measure the levels and functionality of various clotting factors, such as the von Willebrand factor, factor VIII, factor IX, and others. Genetic testing is also performed to identify specific gene mutations responsible for the disorder.

The increasing prevalence of genetic variations or immune dysfunction that impact the production or functioning of the proteins involved in the clotting process is primarily driving the coagulation protein disorders market. In addition to this, the inflating utilization of efficacious treatment modalities, such as factor replacement therapy,

antifibrinolytic agents, and desmopressin, is also creating a positive outlook for the market. These therapies aim to replace the missing clotting factors or stimulate their production, thereby effectively managing the bleeding risk and improving patients' quality of life. Moreover, the widespread adoption of physical therapies and specialized exercise regimens in order to boost joint health, enhance muscular strength, and minimize bleeding episodes is further bolstering the market growth. Apart from this, the rising usage of novel interventions like gene therapy, since it involves inserting a functional gene into the genome to permanently rectify the genetic anomalies that lead to inadequate production of clotting factors, is acting as another significant growth-inducing factor. Furthermore, the ongoing advancements in diagnostic techniques, including next-generation sequencing and genetic counseling, which offer a comprehensive approach to patient care by providing early and accurate diagnosis of the conditions, are expected to drive the coagulation protein disorders market during the forecast period.

IMARC Group's new report provides an exhaustive analysis of the coagulation protein disorders market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for coagulation protein disorders and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the coagulation protein disorders market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France
United Kingdom
Italy
Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the coagulation protein disorders market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the coagulation protein disorders market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape

This report also provides a detailed analysis of the current coagulation protein disorders marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug Overview

Mechanism of Action

Regulatory Status

Clinical Trial Results

Drug Uptake and Market Performance

Late-Stage Pipeline Drugs

*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report

Key Questions Answered in this Report

Market Insights

How has the coagulation protein disorders market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the coagulation protein disorders market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the coagulation protein disorders market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of coagulation protein disorders across the seven major markets?

What is the number of prevalent cases (2018-2034) of coagulation protein disorders by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of coagulation protein disorders by gender across the seven major markets?

What is the number of prevalent cases (2018-2034) of coagulation protein disorders by type across the seven major markets?

How many patients are diagnosed (2018-2034) with coagulation protein disorders across the seven major markets?

What is the size of the coagulation protein disorders patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of coagulation protein disorders?

What will be the growth rate of patients across the seven major markets?

Coagulation Protein Disorders: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for coagulation protein disorders drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the coagulation protein disorders market?

What are the key regulatory events related to the coagulation protein disorders market?

What is the structure of clinical trial landscape by status related to the coagulation protein disorders market?

What is the structure of clinical trial landscape by phase related to the coagulation protein disorders market?

What is the structure of clinical trial landscape by route of administration related to the coagulation protein disorders market?

- 8.1 Guidelines, Management and Treatment
- 8.2 Treatment Algorithm

9 COAGULATION PROTEIN DISORDERS - UNMET NEEDS

10 COAGULATION PROTEIN DISORDERS - KEY ENDPOINTS OF TREATMENT

11 COAGULATION PROTEIN DISORDERS - MARKETED PRODUCTS

11.1 List of Coagulation Protein Disorders Marketed Drugs Across the Top 7 Markets

11.1.1 Eloctate (Efmoroctocog alfa) - Bioverativ/Swedish Orphan Biovitrum

11.1.1.1 Drug Overview

11.1.1.2 Mechanism of Action

11.1.1.3 Regulatory Status

11.1.1.4 Clinical Trial Results

11.1.1.5 Sales Across Major Markets

11.1.2 Adynovate (Rurioctocog alfa pegol) - Takeda

11.1.2.1 Drug Overview

11.1.2.2 Mechanism of Action

11.1.2.3 Regulatory Status

11.1.2.4 Clinical Trial Results

11.1.2.5 Sales Across Major Markets

11.1.3 Hemlibra (Emicizumab-Kxwh) - Chugai Pharmaceutical

11.1.3.1 Drug Overview

11.1.3.2 Mechanism of Action

11.1.3.3 Regulatory Status

11.1.3.4 Clinical Trial Results

11.1.3.5 Sales Across Major Markets

11.1.4 Afstyla (Lonoctocog alfa) - CSL

11.1.4.1 Drug Overview

11.1.4.2 Mechanism of Action

11.1.4.3 Regulatory Status

11.1.4.4 Clinical Trial Results

11.1.4.5 Sales Across Major Markets

11.1.5 Jivi (Damoctocog alfa pegol) - Bayer HealthCare

11.1.5.1 Drug Overview

11.1.5.2 Mechanism of Action

11.1.5.3 Regulatory Status

11.1.5.4 Clinical Trial Results

11.1.5.5 Sales Across Major Markets

12 COAGULATION PROTEIN DISORDERS - PIPELINE DRUGS

12.1 List of Coagulation Protein Disorders Pipeline Drugs Across the Top 7 Markets

12.1.1 PF-06741086 - Pfizer

12.1.1.1 Drug Overview

- 12.1.1.2 Mechanism of Action
- 12.1.1.3 Clinical Trial Results
- 12.1.1.4 Safety and Efficacy
- 12.1.1.5 Regulatory Status
- 12.1.2 Concizumab - Novo Nordisk
 - 12.1.2.1 Drug Overview
 - 12.1.2.2 Mechanism of Action
 - 12.1.2.3 Clinical Trial Results
 - 12.1.2.4 Safety and Efficacy
 - 12.1.2.5 Regulatory Status
- 12.1.3 SerpinPC - ApcinteX
 - 12.1.3.1 Drug Overview
 - 12.1.3.2 Mechanism of Action
 - 12.1.3.3 Clinical Trial Results
 - 12.1.3.4 Safety and Efficacy
 - 12.1.3.5 Regulatory Status

Kindly note that the above only represents a partial list of pipeline drugs, and the complete list has been provided in the report.
