Abstracts

The global coco coir market size reached US\$ 373.2 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 604.2 Million by 2032, exhibiting a growth rate (CAGR) of 5.33% during 2024-2032. The global market is primarily driven by the increasing adoption of coco coir in sustainable agricultural practices, the growing demand for organic farming alternatives, continual advancements in agricultural technologies, and strong regulatory support for eco-friendly materials.

Coco Coir Market Analysis:

Major Market Drivers: The market is driven by the growing demand for sustainable agricultural production methods and the increasing demand for organic farming across the globe. The usage of coco coir as a soil enhancer due to its environmental benefits and multi-purpose applications augments the market demand globally.

Key Market Trends: One of the major trends in the market is the wide use of coco coir for advanced agricultural production, such as hydroponics and greenhouse cultivation. Also, changing customer preferences for organic and environmentally friendly gardening products stimulates the market's growth.

Geographical Trends: Currently, the leading market for coco coir is North America due to strict regulations on sustainable agricultural production and high investment in organic farming.

Competitive Landscape: The key players operating in the market include Klasmann-Deilmann GmbH, Kumaran Fibres, Lanka Coco Products (Pvt) Ltd, Natural Coir Industries, Pelemix Ltd., etc. They expand their operations and distribution channels and undertake extensive innovation in developing new products to maintain their market position.

Challenges and Opportunities: The major challenges for the industry are related to logistical and raw material price issues. Nonetheless, challenging market competition and regulatory support and the growing market for organic food create diverse opportunities for market growth.

Coco Coir Market Trends:

Global shift towards organic farming

The coco coir market outlook is supported by the escalating consumer demand for organically produced goods. With more farmers avoiding synthetic additives and adopting natural alternatives, the demand for coco coir is increasing. Coir that comes from the coconut husks provides soil fertility naturally, which centralizes plant growth without using chemicals. The growth of organic farming practice infrastructure will be a sustainable way of expanding and maintaining the market share, which further makes organic agriculture an important component of modern sustainable agriculture. According to the research institute of organic agriculture (FiBL), the global organic farming area increased by over 20 million hectares in 2022, reaching 96 million hectares. This identity with the value of organic agriculture is helping the entrance of these products in the farmer's communities and represents an important factor enhancing the coco coir market value.

Advancements in agricultural practices

The transformational trends in agriculture, especially in technology application of modern techniques, such as hydroponics and vertical farming, are the main driving force behind the development of the market. Coco coir provides great nutrients as well

as root support for the plants that are needed to be cultivated in a hydroponic farm. With increasing use of these techniques, the variety of coco coir makes it a popular medium in controlled environment agriculture systems, which is pushing up its usage in high-safety farming aids. This trend is observed in the coco coir market overview that highlights its place in the sustainable and technologically advanced agricultural practices that are catering to the urban and space-limited environments.

Regulatory support for sustainable materials

Regulatory schemes and policies around the world are assuming sustainability and eco-friendliness, which, in turn, have a powerful impact on the coco coir market revenue. The rising implementations of higher government regulations against unsustainable agricultural inputs and the offer of subsidies and incentives for the purchase and use of environmentally friendly alternatives further augments the market. Regulatory support will play an essential role in establishing this green product for agricultural and for environment conservation projects. The market is expected to increase rigidly due to the changes in the regulatory scenarios, which has drawn extra attention towards the sustainability aspects across all sectors, enhancing the overall coco coir market growth.

Coco Coir Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the market, along with forecasts at the global, regional, and country levels for 2024-2032. Our report has categorized the market based on product, nature, application, and consumer.

Breakup by Product:

Coco Coir Grow Bags

Bales

Open Tops

Blends and Loose Substrate

Others

Coco coir grow bags account for the majority of the market share

The report has provided a detailed breakup and analysis of the market based on the product. This includes coco coir grow bags, bales, open tops, blends and loose substrate, and others. According to the report, coco coir grow bags represented the largest segment.

Coco coir grow bags represent the largest domain in the market, due to the functional benefits in diverse agricultural settings, particular hydroponics, and urban farming. These grow bags present an ideal root area where water drains normally and air circulates freely, thus making the plants grow better. Their popularity is also supported by their simplicity of installation and reusable character, that augments the sustainable gardening. As revealed by a newly released coco coir market research report, the use of grow bags is projected to continue rising. Improved design, harder-wearing material and environmentally friendly components are some of the factors that enable this growth. In April 2024, RX Green technologies launched new ready to use coco grow bags for streamlined cannabis cultivation. The bags are designed with an expanded base and micro-perforations, enhancing root growth, stability, and drainage efficacy.

Breakup by Nature:

Organic

Conventional

A detailed breakup and analysis of the market based on the nature have also been provided in the report. This includes organic and conventional.

Breakup by Application:

Rope and Cordage

Coco Nets and Twines

Stitched Mats

Coconut Meals

Husk

Others

Coconut meals represent the leading market segment

The report has provided a detailed breakup and analysis of the market based on the application. This includes rope and cordage, coco nets and twines, stitched mats, coconut meals, husk, and others. According to the report, coconut meals represented the largest segment.

Coconut meals lead the coco coir market segmentation. This is supported by the wide utilization of organic agriculture, as a soil enhancer and in feed for animals that are a good fiber source. The analysis also reveals the increasing demand for green coconut husks mainly on account of their ability to foster soil health and to bolster crops' output without the use of pesticides and chemical fertilizers. Furthermore, with more and more demands for natural bedding products, the market gap for coconut meal widens. The research prospects highlight a steady growth in this area propelled by rising awareness of the environmental and nutritional benefits.

Breakup by Consumer:

Green Houses

Sellers

Green houses exhibit a clear dominance in the market

A detailed breakup and analysis of the market based on the consumer have also been provided in the report. This includes green houses and sellers. According to the report, green houses accounted for the largest market share.

Greenhouses rely heavily on coco coir which helps to cut down the costs and improves yields through better control of growing conditions. This is attributed to its properties to moisturize, hold plant in different weather conditions that are needed in greenhouse farming. Coco coir's synergistic role in moisture retention and control significantly enhances plant health and yield in greenhouse environments. Greenhouse practice adoption by such growing growers for crop production in cold seasons further increases

the coco coir demand significantly.

Breakup by Region:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

North America leads the market, accounting for the largest coco coir market share

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America represents the largest regional market for coco coir.

North America leads the market, as it is equipped with highly developed agricultural technologies and a strong orientation towards an environmentally friendly agriculture pattern. The market dominance is based on a well-established system of commercial and hobby gardens, extensive adoption of the organic farming approach, and government subsidies for the use of green agricultural inputs. North America's emphasis on the environmental challenges being relevant to agricultural sector appears to propel the market of eco-friendly materials including coco coir. As per the coco coir market forecast, the North American region probably holds its lead position since the countries here have ongoing innovations in farming and hence increasing environmental consciousness among customers.

Competitive Landscape:

The market research report has also provided a comprehensive analysis of the competitive landscape in the market. Detailed profiles of all major companies have also been provided. Some of the major market players in the coco coir industry include,

Allwin Coir Products

Bali Coco Company

Benlion Coir Industries

Coco Green (Pvt) Ltd

Consarc (Pvt) Ltd

Fibredust LLC

Klasmann-Deilmann GmbH

Kumaran Fibres

Lanka Coco Products (Pvt) Ltd

Natural Coir Industries

Pelemix Ltd.

Pilipinas Ecofiber Corporation

SMS Exports

(Please note that this is only a partial list of the key players, and the complete list is provided in the report.)

The key players in the market are actively attempting to enhance their product portfolios and expand their production capabilities to meet the demands of an expanding global market. They are using cutting-edge technology to extend the product range and improve strength and durability in a range of applications, from hydroponics to traditional gardening. Additionally, organizations are prioritizing strategic acquisitions and partnerships to expand their contact points across the globe. Additionally, marketing and education campaigns are implemented to raise awareness about coco coir benefits, targeting both commercial growers and home users. Major corporations are also investing in ESG-related sustainability activities such as reducing carbon

footprints and optimizing water use in production to ensure their activities are in line with global environmental standards and customer assumptions.

Coco Coir Market News:

On 17th August 2020, FibreDust LLC announced the release of Coir WTF 70/30. The patent pending blend takes coir to the next level.

On 29th July 2021, Consarc achieved final acceptance at a customer's site for the latest generation of Consarc pressure quench horizontal vacuum heat treatment furnaces.

On 31st July 2021, Klasmann-Deilmann GmbH has entered a joint venture with the Dutch Olde Bolhaar Group, the market leader in north-western Europe for green compost production.

Key Questions Answered in This Report

1. What was the size of the global coco coir market in 2023?
2. What is the expected growth rate of the global coco coir market during 2024-2032?
3. What are the key factors driving the global coco coir market?
4. What has been the impact of COVID-19 on the global coco coir market?
5. What is the breakup of the global coco coir market based on the product?
6. What is the breakup of the global coco coir market based on the application?
7. What is the breakup of the global coco coir market based on consumer?
8. What are the key regions in the global coco coir market?
9. Who are the key players/companies in the global coco coir market?
