Abstracts

This report provides an in-depth analysis on the global cocoa market trends and the requirements to start and run a cocoa processing plant. The cocoa bean is the dried and fully fermented fatty seed of the cocoa tree (*Theobroma cacao*). Cocoa processing involves the conversion of cocoa beans into different forms such as cocoa liquor, cocoa butter, cocoa cakes and cocoa powder. The chocolate industry currently represents the biggest end user of cocoa. Processed cocoa products, however, have applications in a number of other industries as well. For instance, cocoa powder is also used to produce chocolate milk, biscuits, ice cream, cakes and a number of other food and beverages. Similarly, cocoa butter is widely used during the production of soaps, cosmetics and pharmaceutical products.

Côte d'Ivoire and Ghana currently represent the world's two biggest producers of cocoa. The two countries together currently account for nearly 60% of the total global cocoa production. Other major producers include Indonesia, Nigeria, Ecuador, Brazil and Cameroon. Region-wise, Africa currently accounts for more than 70% of the total global cocoa production. Despite being the largest producer, the region accounts for less than 21% of the total global cocoa processing market. Though unsuitable for cocoa cultivation, Europe currently represents the world's biggest importer and processor of cocoa. The competitive landscape of the global cocoa processing industry is currently quite concentrated in nature with the top three players currently accounting for around 40% of the total global market.

The report entitled "Cocoa Processing Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2017-2022" provides a comprehensive insight into the historical and current trends in the cocoa processing industry. This study serves as

an exceptional tool to understand the market trends, regional markets, growth, key players, value chain, success and risk factors, manufacturing process, raw material requirements, machinery requirements, capital costs, operating costs, incomes, expenditures and profits in the cocoa processing industry. This study can serve as an excellent tool for cocoa cultivators, cocoa processors, consultants, researchers, marketing strategists, investors and all those who plan to foray into the cocoa market in any form.
