Abstracts

The global command and control system market size reached US\$ 36.3 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 45.9 Billion by 2028, exhibiting a growth rate (CAGR) of 4.2% during 2023-2028.

A command and control system refers to a combination of facilities, equipment, communications, procedures, and hardware essentials to carry out military operations and activities. It also involves formulating concepts, deploying forces, allocating resources, and supervising. It assists military organizations in planning, directing, and controlling operations-assigned forces while enhancing individual performance. Presently, automated combat direction systems are used in a complex multi-threat environment as they make it possible to deal with the massive number of targets and compressed reaction times of modern warfare.

Command and Control System Market Trends:

The rising geopolitical tensions between countries are escalating the need for situational awareness in military and law enforcement agencies. This represents one of the key factors escalating the demand for the command and control systems to keep track of combatant ships, aircraft, and weapons. It also involves earth-observation satellites for communications, data collection and processing, and detection and warning. Moreover, it can perform various procedural and technical functions, such as coordinate supporting arms, supervise air traffic, and fire control weapons systems. Furthermore, the system is being employed in airports, utilities, oil and gas installation plants, and research labs for better operations, safety, security, and surveillance. Apart from this, the leading players are continuously upgrading and modernizing command and control systems to cater to the needs of the defense sector. This, along with a significant rise in military

budgets of numerous countries, is anticipated to present lucrative opportunities for market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global command and control system market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on platform, solution and application.

Breakup by Platform:

- Land
- Maritime
- Space
- Airborne

Breakup by Solution:

- Hardware
- Software
- Services

Breakup by Application:

- Defense
- Commercial

Breakup by Region:

- North America
 - United States
 - Canada
- Asia-Pacific
 - China
 - Japan
 - India
 - South Korea
- Australia
- Indonesia

Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being BAE Systems plc, CACI International Inc., Elbit Systems Ltd., General Dynamics Mission Systems Inc (General Dynamics Corporation), L3Harris Technologies Inc., Leonardo S.p.A., Lockheed Martin Corporation, Northrop Grumman Corporation, Raytheon Technologies Corporation, RGB Spectrum, Saab AB, Thales Group and The Boeing Company.

Key Questions Answered in This Report

1. What was the size of the global command and control system market in 2022?
2. What is the expected growth rate of the global command and control system market during 2023-2028?
3. What are the key factors driving the global command and control system market?
4. What has been the impact of COVID-19 on the global command and control system market?
5. What is the breakup of the global command and control system market based on the platform?
6. What is the breakup of the global command and control system market based on the solution?
7. What is the breakup of the global command and control system market based on the application?
8. What are the key regions in the global command and control system market?
9. Who are the key players/companies in the global command and control system market?
