Abstracts

The global commercial kitchen appliances market size reached US\$ 93.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 137.0 Billion by 2028, exhibiting a growth rate (CAGR) of 6.4% during 2023-2028.

Commercial kitchen appliances include refrigerators, freezers, icemakers, ranges, ovens, grills, microwaves, broilers, slicers, food processors, blenders, mixers and grinders, burners, toasters, griddles, deep fryers, dishwashers, and display food warmers. These appliances are utilized in commercial kitchens of resorts, hotels, hospitals, railway dining, institutional canteens, and full-service restaurants (FSRs) to help increase work efficiency, ease food preservation, and reduce wastage. They also assist in space management and improving the cooking speed as well as the overall customer experience.

Commercial Kitchen Appliances Market Trends:

The thriving hospitality sector represents one of the key factors stimulating the growth of the market. Additionally, there is a rapid expansion of quick-service restaurants (QSRs), also known as fast-food restaurants, around the world. These restaurants rely on commercial kitchen appliances, such as speed ovens combining convection, microwave, and grill components, which are available with preset roasting and baking programs that aid in producing food in less time. Apart from this, QSR chains are adapting to local tastes and incorporating multi-cuisine food preparations in their food menu on account of the increasing number of customers experimenting with new food and developing a taste for different cuisines. This, coupled with the escalating demand for drive-through services due to hectic schedules and busy lifestyles of individuals, is positively influencing the market. Moreover, key players are introducing advanced

variants to strengthen their market reach. Furthermore, the rising focus on the utilization of eco-friendly and energy-efficient commercial kitchen appliances is facilitating market growth. Other factors, including increasing concerns about food safety and significant growth in the travel and tourism industry, are projected to augment the overall sales and profitability in the coming years.
