Abstracts

The 7 major common warts markets reached a value of US\$ 761.4 Million in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 1,056.6 Million by 2034, exhibiting a growth rate (CAGR) of 3.02% during 2024-2034.

The common warts market has been comprehensively analyzed in IMARC's new report titled "Common Warts Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Common warts, also known as verruca vulgaris, are a type of skin growth resulting from an infection caused by the human papillomavirus (HPV). They typically manifest as small, round, or irregularly shaped bumps that can vary in color, ranging from flesh-colored to tan, gray, or yellowish. These warts commonly occur on the hands, fingers, and around the nails but can also appear on other parts of the body. While they are usually painless, they may cause mild itching, tenderness, or discomfort, particularly when located in areas subject to friction or pressure. The diagnosis of common warts is generally based on their distinctive appearance and characteristic symptoms. Healthcare professionals, such as dermatologists or general practitioners, can typically diagnose them through a visual examination of the skin. They may inspect the size, shape, texture, and location of the wart. In some cases, a healthcare provider may utilize a dermatoscope, a handheld device that magnifies the skin, to get a closer look at the wart. In rare instances where the diagnosis is uncertain or if there are atypical features, a skin biopsy may be performed to rule out other conditions.

The increasing incidences of direct contact with infected individuals through various activities, including sharing personal items like towels or razors and engaging in sexual acts, etc., are primarily driving the common warts market. Furthermore, the rising

prevalence of several associated risk factors, such as weakened immune systems, skin conditions like eczema or skin abrasions, multiple sexual partners, etc., is creating a positive outlook for the market. Apart from this, the widespread adoption of immune checkpoint inhibitors and topical immune modulators for stimulating the body's immune system to target and eliminate the wart is also bolstering the market growth. Moreover, several key players are making extensive investments in R&D activities to introduce novel drug therapies that target specific molecular pathways involved in wart formation and persistence, aiming to inhibit viral replication and disrupt wart cell signaling. This, in turn, is acting as another significant growth-inducing factor. Additionally, the ongoing advancements in laser technology, such as the introduction of pulsed dye and erbium YAG lasers, which offer precise and targeted destruction of wart tissue while minimizing damage to surrounding healthy skin, are expected to drive the common warts market during the forecast period.

IMARC Group's new report provides an exhaustive analysis of the common warts market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for common warts and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the common warts market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom
Italy
Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario
Historical, current, and future performance of the common warts market
Historical, current, and future performance of various therapeutic categories in the market
Sales of various drugs across the common warts market
Reimbursement scenario in the market
In-market and pipeline drugs
Competitive Landscape:
This report also provides a detailed analysis of the current common warts marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug Overview
Mechanism of Action
Regulatory Status
Clinical Trial Results
Drug Uptake and Market Performance

Late-Stage Pipeline Drugs

Drug Overview
Mechanism of Action
Regulatory Status
Clinical Trial Results
Drug Uptake and Market Performance

*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report.

Key Questions Answered in this Report:
Market Insights

How has the common warts market performed so far and how will it perform in the coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the common warts market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the common warts market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of common warts across the seven major markets?

What is the number of prevalent cases (2018-2034) of common warts by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of common warts by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with common warts across the seven major markets?

What is the size of the common warts patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of common warts?

What will be the growth rate of patients across the seven major markets?

Common Warts: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for common warts drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc.

related to the common warts market?

What are the key regulatory events related to the common warts market?

What is the structure of clinical trial landscape by status related to the common warts market?

What is the structure of clinical trial landscape by phase related to the common warts market?

What is the structure of clinical trial landscape by route of administration related to the common warts market?

12 COMMON WARTS - PIPELINE DRUGS

12.1 List of Common Warts Pipeline Drugs Across the Top 7 Markets

12.1.1 Candin - Nielson Biosciences

12.1.1.1 Drug Overview

12.1.1.2 Mechanism of Action

12.1.1.3 Clinical Trial Results

12.1.1.4 Safety and Efficacy

12.1.1.5 Regulatory Status

12.1.2 KNP2002 - Kino Pharma

12.1.2.1 Drug Overview

12.1.2.2 Mechanism of Action

12.1.2.3 Clinical Trial Results

12.1.2.4 Safety and Efficacy

12.1.2.5 Regulatory Status

12.1.3 VP 102 - Verrica Pharmaceuticals

12.1.3.1 Drug Overview

12.1.3.2 Mechanism of Action

12.1.3.3 Clinical Trial Results

12.1.3.4 Safety and Efficacy

12.1.3.5 Regulatory Status

12.1.4 VDMN 21 - Veradermics

12.1.4.1 Drug Overview

12.1.4.2 Mechanism of Action

12.1.4.3 Clinical Trial Results

12.1.4.4 Safety and Efficacy

12.1.4.5 Regulatory Status

Kindly note that the above only represents a partial list of pipeline drugs, and the complete list has been provided in the report.

13. COMMON WARTS - ATTRIBUTE ANALYSIS OF KEY MARKETED AND PIPELINE DRUGS

14. COMMON WARTS – CLINICAL TRIAL LANDSCAPE

14.1 Drugs by Status

14.2 Drugs by Phase

14.3 Drugs by Route of Administration

14.4 Key Regulatory Events

15. COMMON WARTS - MARKET SCENARIO

15.1 Market Scenario - Key Insights

15.2 Market Scenario - Top 7 Markets

15.2.1 Common Warts - Market Size

15.2.1.1 Market Size (2018-2023)

15.2.1.2 Market Forecast (2024-2034)

15.2.2 Common Warts - Market Size by Therapies

15.2.2.1 Market Size by Therapies (2018-2023)

15.2.2.2 Market Forecast by Therapies (2024-2034)

15.3 Market Scenario - United States

15.3.1 Common Warts - Market Size

15.3.1.1 Market Size (2018-2023)

15.3.1.2 Market Forecast (2024-2034)
