Abstracts

The global cosmetic implants market size reached US\$ 10.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 15.4 Billion by 2028, exhibiting a growth rate (CAGR) of 7.28% during 2022-2028.

Cosmetic implants refer to devices or tissues that are placed inside or on the surface of the body. They are generally made from skin, bone, tissues, metal, plastic, ceramic and other materials. They are widely utilized in surgical procedures to improve the overall appearance and rectify deformities caused due to accidents and congenital disorders. At present, cosmetic implants are gaining traction around the world on account of the growing influence of social media and the rising awareness among individuals about physical appearance.

Cosmetic Implants Market Trends:

Rapid economic development, coupled with the improving healthcare infrastructure, represents one of the key factors catalyzing the demand for cosmetic implants across the globe. Besides this, there is a significant rise in the incidences of congenital face disorders and tooth deformities. This, along with the increasing western influence on account of the surging number of individuals who use social media networking platforms, is also contributing to the market growth. Furthermore, the market is driven by the emergence of minimally invasive reconstruction surgeries that assists in improving the appearance and function of abnormal body parts. These procedures are being widely performed by surgeons worldwide for tumor removal, laceration repair, scar revision, hand surgery, and breast reconstruction. Moreover, numerous technological advancements, such as the introduction of hyaluronic acid facial filler and two form-stable silicone gel breast implants, are creating a favorable market outlook.

The market is also anticipated to experience growth due to several initiatives undertaken by governing and healthcare agencies of different countries to promote patient awareness about cosmetic implants. For instance, the American Society of Plastic Surgeons (ASPS) and The Plastic Surgery Foundation (The PSF) are sponsoring the Breast Reconstructive Awareness Campaign to educate women about the post-breast cancer diagnosis.
