## **Abstracts**

The global crushing, screening, and mineral processing equipment market size reached US\$ 22.7 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 34.2 Billion by 2032, exhibiting a growth rate (CAGR) of 4.5% during 2024-2032. Increasing construction activities, rising investments in various infrastructure projects, and growing product usage in energy production represent some of the key factors driving the market.

Crushing equipment is used to break down large rocks into smaller and more manageable pieces. On the other hand, screening equipment is utilized to separate different size fractions of crushed material. It is generally performed using a vibrating screen with various sized meshes. Besides this, mineral processing equipment comprises multiple tools, such as grinding mills, flotation cells, and filters. The crushing, screening, and mineral processing equipment collectively is used to extract and process minerals and other natural resources. It is designed with safety features to minimize the risk of accidents and injuries on the sites. It facilitates faster and more efficient processing of raw materials and improves productivity and profitability.

Crushing, Screening, and Mineral Processing Equipment Market Trends:  
Rapid urbanization and the increasing number of construction projects in residential,

commercial, and industrial areas represent one of the major factors driving the demand for crushing, screening, and mineral processing equipment around the world. Moreover, governments of numerous countries are investing in infrastructural projects, such as roads, bridges, and buildings. This, coupled with significant growth in the construction industry, is favoring the growth of the market. In addition, crushing, screening, and mineral processing equipment is employed in the mining industry to process various materials, including minerals, ores, coal, and rock. These materials are processed to produce a usable end product, such as coal for electricity generation or iron ore for steel production. Apart from this, the rising adoption of crushing, screening, and mineral processing equipment in energy production, such as coal and natural gas, is contributing to the market growth. Furthermore, there is an increase in the integration of the internet of things (IoT), artificial intelligence (AI), machine learning (ML), and 3D printing technology to manufacture different components of the equipment and help analyze data and improve the performance of equipment. These advanced technologies also enable the autonomous operation to operate without human intervention to enhance efficiency and safety on a worksite. This, coupled with the launch of advanced materials, such as ceramics and composites, to offer improved performance and longer wear life is creating a positive outlook for the market.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global crushing, screening, and mineral processing equipment market, along with forecasts at the global, regional, and country level from 2024-2032. Our report has categorized the market based on type, mobility, and application.

#### Type Insights:

Crushing and Screening Equipment  
Mineral Processing Equipment

The report has provided a detailed breakup and analysis of the crushing, screening, and mineral processing equipment market based on the type. This includes crushing and screening equipment and mineral processing equipment. According to the report, crushing and screening equipment accounted for the largest market share.

#### Mobility Insights:

Stationary  
Portable  
Mobile

A detailed breakup and analysis of the crushing, screening, and mineral processing equipment market based on the mobility has also been provided in the report. This includes stationary, portable, and mobile. According to the report, portable represented the largest segment.

#### Application Insights:

Construction and Plant Modification

Mining

Foundries and Smelters

Others

The report has provided a detailed breakup and analysis of the crushing, screening, and mineral processing equipment market based on the application. This includes construction and plant modification, mining, foundries and smelters, and others. According to the report, construction and plant modifications accounted for the largest market share.

#### Regional Insights:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. According to the report, North America was the largest market for crushing, screening, and mineral processing equipment. Some of the factors driving the North America crushing, screening, and mineral processing equipment market included the growth of the construction and mining industries, adoption of automation technology, technological advancements in equipment design, demand for recycled materials, and increasing demand for construction materials.

#### Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global crushing, screening, and mineral processing equipment market. Competitive analysis such as market structure, market share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. Some of the companies covered Astec Industries Inc., Caterpillar Inc., Hazemag & Epr Gmbh, Mccloskey International Ltd. (Metso Outotec Oyj), Meka, Rubble Master Hmh Gmbh, Sandvik AB, Screen Machine Industries Inc., Shibang Industry & Technology Group Co. Ltd., Terex Corporation, The Weir Group plc, thyssenkrupp Industries India Pvt. Ltd. (ThyssenKrupp AG), Wirtgen India Private Limited (Deere & Company), etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

#### Key Questions Answered in This Report:

How has the global crushing, screening, and mineral processing equipment market performed so far, and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global crushing, screening, and mineral processing equipment market?

What is the impact of each driver, restraint, and opportunity on the global crushing, screening, and mineral processing equipment market?

What are the key regional markets?

Which countries represent the most attractive crushing, screening, and mineral processing equipment markets?

What is the breakup of the market based on the type?

Which is the most attractive type in the crushing, screening, and mineral processing equipment market?

What is the breakup of the market based on the mobility?

Which is the most attractive mobility in the crushing, screening, and mineral processing equipment market?

What is the breakup of the market based on the application?

Which is the most attractive application in the crushing, screening, and mineral processing equipment market?

What is the competitive structure of the global crushing, screening, and mineral processing equipment market?

Who are the key players/companies in the global crushing, screening, and mineral processing equipment market?
