Abstracts

The global cryotherapy market size reached US\$ 310.5 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 446.7 Million by 2028, exhibiting a growth rate (CAGR) of 6.25% during 2022-2028. The growing geriatric population, increasing prevalence of cancer and increasing cases of anxiety, asthma, migraine, and muscle soreness represent some of the key factors driving the market.

Cryotherapy refers to a medical therapy that relies on extremely low temperatures for treatment. It helps reduce pain in the body and improves skin health and texture by promoting collagen production. It also helps boost immune function by increasing levels of white blood cells in the body. Moreover, cryotherapy aids in relieving migraines and headaches by constricting blood vessels in the head and reducing inflammation. It is employed to treat a variety of medical conditions, including sports injuries, arthritis, skin conditions, and chronic pain. It is also used by athletes to treat sports injuries, such as muscle strains, help speed up recovery time after injury, and improve performance.

Cryotherapy Market Trends:

At present, the growing popularity of sports and fitness activities is resulting in the increasing incidence of sports injuries. This represents one of the key factors positively influencing the market across the globe. In addition, the growing geriatric population and increasing prevalence of cancer are catalyzing the demand for cryotherapy for fast recovering, reducing complications, and minimizing hospital stays. This, in confluence with sedentary lifestyles, unhealthy dietary patterns, and increasing cases of anxiety, asthma, migraine, and muscle soreness, is creating a favorable market outlook. Apart from this, the rising influence of social media and the growing interest in wellness and beauty treatments, in confluence with the increasing preference for non-invasive treatments for skin conditions, is strengthening the market growth. Moreover, the rising

demand for cost-effective treatment options is catalyzing the demand for cryotherapy as a potential alternative to more expensive treatments, such as surgeries. In line with this, the development of cryo-chambers and cryo-saunas for the treatment of inflammation, rheumatoid arthritis, and chronic pain, are fueling the market growth. Additionally, the increasing accessibility and the rising affordability of cryotherapy are contributing to the market growth. Furthermore, significant improvements in the healthcare infrastructure, along with extensive investments in research and development (R&D) activities, are fueling the growth of the market worldwide., Some of the other factors stimulating the growth of the market across the globe include inflating disposable incomes, increasing awareness about the benefits of cryotherapy, and flourishing wellness and fitness industries.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global cryotherapy market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product, application and end user.

Product Insights:

- Cryosurgery Devices
- Tissue Contact Probes
- Tissue Spray Probes
- Epidermal and Subcutaneous Cryoablation Devices
- Localized Cryotherapy Devices
- Cryochambers and Cryosaunas

The report has provided a detailed breakup and analysis of the cryotherapy market based on the product. This includes cryosurgery devices (tissue contact probes, tissue spray probes, epidermal and subcutaneous cryoablation devices), localized cryotherapy devices, and cryochambers and cryosaunas. According to the report, cryochambers and cryosaunas accounted for the largest market share.

Application Insights:

- Surgical Applications
- Oncology
- Cardiology
- Dermatology

Others

Pain Management

Recovery, Health and Beauty

A detailed breakup and analysis of the cryotherapy market based on the application has also been provided in the report. This includes surgical applications (oncology, cardiology, dermatology, and others), pain management, and recovery, health and beauty. According to the report, pain management accounted for the largest market share.

End User Insights:

Hospitals and Specialty Clinics

Cryotherapy Centres

Spas and Fitness Centres

A detailed breakup and analysis of the cryotherapy market based on the end user has also been provided in the report. This includes hospitals and specialty clinics, cryotherapy centers, spas and fitness centers. According to the report, cryotherapy centers accounted for the largest market share.
