Abstracts

The global digital holography market size reached US\$ 4.5 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 18.5 Billion by 2032, exhibiting a growth rate (CAGR) of 16.6% during 2024-2032.

Digital holography refers to a technique of interferometric imaging that can be used to perform simultaneous imaging of multidimensional objects or products. The process involves multiple light waves produced by scattering a laser beam (through a beam splitter) that are used to illuminate the object and to create its image by using the principle of diffraction. This image is achieved by combining or interference of the coherent reference waves with the waves received from the sample or object which needs to be imaged. The interference of these waves is recorded through a video camera and further transmitted to a computer for a 3D reconstruction. The technique finds extensive application in the fields of medical sciences, engineering, advertising, education, art, marketing, design studies, etc.

The growing demand for high-end technological solutions in the manufacturing and healthcare industries is the key factor driving the growth of the market. The awareness

about the utilization of digital holography for performing non-invasive and effective diagnosis of medical ailments and conducting biomedical research is continuously increasing across the globe. Furthermore, extensive use of digital holograms in ophthalmology, orthopedics and dentistry is also catalyzing the growth of the market. The holography process is also used in microwave and X-rays to detect objects through impenetrable barriers; in quality checks for identifying stress or abnormalities in a product; and for eliminating the need for dark rooms and chemicals to obtain analog holograms. Additionally, increasing investments in technological developments coupled with the product innovations are also contributing to the market growth. For instance, the introduction of 3D glasses is used to alter and enhance the perspective view for the user, thus providing them with more clarity and better satisfaction.

IMARC Group's latest report provides a deep insight into the global digital holography market covering all its essential aspects. This ranges from macro overview of the market to micro details of the industry performance, recent trends, key market drivers and challenges, SWOT analysis, Porter's five forces analysis, value chain analysis, etc. This report is a must-read for industry players, investors, researchers, consultants, business strategists, and all those who have any kind of stake or are planning to foray into the digital holography industry in any manner.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global digital holography market report, along with forecasts at the global and regional level from 2024-2032. Our report has categorized the market based on technology type, component type, application and vertical.

Breakup by Technology Type:

- Gabor's (In-Line) Holography
- Off-Axis Holography
- Others

Breakup by Component Type:

- Hardware
- CCD Camera
- Laser
- Micro-display

Beam Splitter
Mirror
Others
Software

Breakup by Application:

Digital Holographic Displays
Digital Holographic Microscopy
Holographic Television and Telepresence
Others

Breakup by Vertical:

Automotive
Medical
Aerospace and Defense
Others

Breakup by Region:

Asia Pacific
Europe
North America
Middle East and Africa
Latin America

Competitive Landscape:

The report has also analysed the competitive landscape of the market with some of the key players being Lync?e Tec, EON Reality, Inc., HoloTech Switzerland AG, RealView Imaging Ltd., Ovizio Imaging Systems NV/SA, Holoxica Ltd, Geola Digital UAB, zSpace, Inc., Jasper Display Corporation, and Leia Inc.

Key Questions Answered in This Report

1. What was the size of the global digital holography market in 2023?
2. What is the expected growth rate of the global digital holography market during 2024-2032?
3. What has been the impact of COVID-19 on the global digital holography market?

4. What are the key factors driving the global digital holography market?
5. What is the breakup of the global digital holography market based on the component type?
6. What is the breakup of the global digital holography market based on the application?
7. What is the breakup of the global digital holography market based on the vertical?
8. What are the key regions in the global digital holography market?
9. Who are the key players/companies in the global digital holography market?
