### Market Overview:

The global diethyl maleate market size reached US\$ 279.7 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 339.7 Million by 2028, exhibiting a growth rate (CAGR) of 3.12% during 2023-2028.

Diethyl maleate (DOM) is a clear, colorless liquid with an ester-like odor. It is widely used as a chemical intermediate and building block in several chemical production processes. For example, it is utilized in coating applications and the production of derivatives of succinic acid. It also finds application as a comonomer in vinyl and acrylic emulsion polymerization for paints and adhesives and a phthalate-free alternative to common phthalate-based plasticizers like diethyl phthalate (DEP). Nowadays, it is copolymerized with monomers, such as styrene, vinyl acetate and acrylates, to provide elasticity and flexibility to the films.

### Diethyl Maleate Market Trends:

The escalating demand for convenient, packaged food products on account of rapid urbanization and busy schedules represents one of the key factors creating a positive outlook for the market. DOM is utilized in food packaging, paper plates, cutlery, and small appliances like roasters. Moreover, DOM acts as a plasticizer, emollient, and skin-conditioning agent in manufacturing personal care and cosmetics products, such as moisturizers, cleansers, makeup, shampoos, conditioners, and styling aids. Rising beauty consciousness among individuals, inflating per capita income and the growing influence of social media are influencing the demand for cosmetics worldwide. Apart from this, a shift towards waterproof and heat-resistant apparel and fabrics is catalyzing the demand for DOM to manufacture textile coatings for leather and sports clothing. In

In addition, the increasing participation of individuals in sports activities is contributing to market growth. Furthermore, the flourishing construction industry on account of rapid urbanization and the rising global population is influencing the demand for DOM positively to make adhesives, concrete, ceramic tiles, flooring underlayment, pre-finished panels, waterproofing, and roofing around the world.
