Abstracts

The global dishwasher tablets market size reached US\$ 567.5 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 832.8 Million by 2028, exhibiting a growth rate (CAGR) of 6.2% during 2023-2028.

Dishwasher tablets refer to a type of detergent used for cleaning and washing dishes in the dishwasher. They contain chemicals to soften hard water, bleaches to remove tough stains, enzymes to dissolve starch and protein-based foods quickly, and surfactants to add shine to the dishes after the wash. Nowadays, they are available in various types, depending on the requirements of the users. For instance, some tablets comprise powder detergent in compact form, while others are composed of specialized formulated gels. Over the years, dishwasher tablets have gained traction as a more convenient and efficient alternative to traditional powder detergent as they minimize wastage, reduce the risk of spills, and protect dishwashers.

Dishwasher Tablets Market Trends:

The growing awareness regarding hygiene and cleanliness among the masses represents the primary factor driving the market. Dishwasher tablets contain pre-measured and efficient ingredients that prevent the overuse of detergent in dishwashing and increase the lifespan of the machine. As they offer increased convenience and help save water and energy, dishwasher tablets are rapidly gaining popularity among consumers. Additionally, the increasing number of food restaurants and eateries across the globe is another major growth-inducing factor. Besides this, the leading manufacturers are launching multi-functional dishwasher tablets that eliminate the need for rinsing agents, salts, and other additives during washing. This, in confluence with the surging sales of smart dishwashers, is catalyzing the product demand. Furthermore,

dishwasher tablets minimize the amount of detergent entering the water supply, which eases the burden on water treatment plants. Other factors, including the growing environmental concerns, rising disposable incomes, easy product availability via e-commerce platforms and product premiumization, are also creating a positive market outlook.
