Abstracts

The global distributed control systems (DCS) market size reached US\$ 19.0 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 26.5 Billion by 2028, exhibiting a growth rate (CAGR) of 5.7% during 2022-2028.

A distributed control system (DCS) refers to an automated management solution to supervise various industrial processes. It is used for data acquisition, data presentation, process control, process supervision and reporting information. It consists of numerous local controllers for plant control that are connected to a high-speed communication network. It also aids in minimizing the risks of component failure and facilitates the timely upgradation of obsolete technologies. In comparison to the traditionally used centralized control systems, DCS can be used for large and complex industrial processes and offers enhanced reliability of control. As a result, it finds extensive applications across various industries, such as oil and gas, chemical, food and beverage, nuclear power, wastewater management and automotive.

Significant growth in the oil and gas industry, along with increasing industrial automation across the globe, is one of the key factors creating a positive outlook for the market. Furthermore, the rising requirement for efficient optimization solutions in the power and energy sectors is providing a thrust to the market growth. DCS enables the operators to individually control, report and monitor plant components and manage databases, graphics, control logic and system security systems. Additionally, various technological advancements, such as the development of improved internet-based systems integrated with the Industrial Internet of Things (IIoT), are acting as other growth-inducing factors. These systems can process multiple variables and control signals to various valves, motors and actuators. Other factors, including rapid industrialization, along with extensive research and development (R&D) activities, are anticipated to drive the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global distributed control systems (DCS) market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on component, process and application.

Breakup by Component:

Hardware

Software

Services

Breakup by Process:

Continuous Process

Batch-oriented Process

Breakup by Application:

Power Generation

Oil and Gas

Chemicals

Food and Beverage

Mining and Metals

Paper and Pulp

Pharmaceutical

Others

Breakup by Region:

North America

United States

Canada

Asia Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

Competitive Landscape:

The report has also analysed the competitive landscape of the market with some of the key players being ABB Ltd., Azbil Corporation, Emerson Electric Co., Honeywell International Inc., Mitsubishi Motors Corporation, Omron Corporation, Rockwell Automation Inc., Schneider Electric SE, Siemens Aktiengesellschaft and Toshiba Corporation.

Key Questions Answered in This Report:

How has the global distributed control systems (DCS) market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global distributed control systems (DCS) market?

What are the key regional markets?

What is the breakup of the market based on the component?

What is the breakup of the market based on the process?

What is the breakup of the market based on the application?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global distributed control systems (DCS) market and who are the key players?

What is the degree of competition in the industry?
