Abstracts

The global diving suits market size reached US\$ 516.3 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 711.9 Million by 2028, exhibiting a growth rate (CAGR) of 5.50% during 2022-2028.

Diving suits are waterproof garments worn by divers to aid them in exploring deep underwater. They comprise removable helmets and air supply devices, which protect them from surrounding water pressure, barotrauma, and decompression sickness. At present, several manufacturers are offering modern suits, such as soft, ambient pressure and atmospheric pressure. Amongst these, ambient pressure suits are made from neoprene, heavy-duty fabric and coated with rubber or polyvinyl chloride (PVC). They are widely used in scuba or free diving to safeguard divers from cold and abrasive and sharp objects.

Diving Suits Market Trends:

The growing participation of individuals in scuba diving, along with the increasing number of professional divers, represents one of the major factors positively influencing the demand for specialized diving suits. Besides this, there is a significant rise in the need for commercial divers in the oil and gas industry to maintain oil rigs and repair damages resulting from hurricanes and other environmental conditions. Diving suits help divers inspect structures, control checks, perform seismic surveys and geological appraisals, and install fiber optic cable on the ocean floor. This, in confluence with the flourishing oil and gas sector on account of the escalating demand for energy, is further driving the market growth. Apart from this, scuba diving provides several health benefits, such as improving blood circulation, relieving stress, reducing blood pressure, and increasing muscle strength and flexibility. This, along with the rising prevalence of medical conditions and the growing health consciousness, is catalyzing the demand for

diving suits worldwide. In addition, the increasing popularity of outdoor and water sport activities is catalyzing the demand for diving tourism. Furthermore, the emerging trend of underwater photography and videography is creating a positive market outlook.
