Market Overview:

The global door phone market size reached US\$ 4.85 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 7.36 Billion by 2028, exhibiting a growth rate (CAGR) of 6.9% during 2023-2028. The emerging trend of smart homes, launch of advanced product variants, and rising funding by governing agencies represent some of the key factors driving the market.

A door phone refers to a collection of electrical and electronic elements that are mounted on the wall with buttons and a handset. It is widely used to communicate with a guest outside of a house, apartment, and villa. It also enables the unlocking and locking of the main gate and provides a higher level of security. It can be interlinked between multiple residences to operate as a safety device and an intercom for saving money on installing and maintaining numerous devices. At present, it is commonly available in the audio variant that enables users to talk with the visitor at the door and the video variant, which allows the resident to identify visitors through the connected screen.

Door Phone Market Trends:

Presently, the increasing instances of thefts and burglaries, coupled with rising concerns about home security, represent one of the major factors driving the demand for door phones around the world. Moreover, the emerging trend of smart homes and

the rising utilization of smart devices on account of inflating income levels and rapid urbanization are supporting the growth of the market. In addition, the growing number of renovation and construction activities in the residential and commercial areas and rising investments in the development of smart cities by governing agencies of numerous countries are currently influencing the market positively. Apart from this, the increasing number of offices, warehouses, stores, hotels, parks, and resorts is catalyzing the demand for door phones to enhance public safety. Furthermore, key players operating in the industry are introducing advanced video door phones that are equipped with voice change function and call recording features, and offer picture recording with the help of main and extension monitors. These advanced variants can also be connected with multiple wired and wireless monitors and LED lights for allowing users to see more precise images. Besides this, the advent of door phone mobile applications to control the opening and closing of the door even from the distant places. In addition, the rising awareness among individuals about the benefits of using door phones is projected to create a positive outlook for the market in the coming years.
