Abstracts

The global drug-eluting stents market size reached US\$ 8.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 13.7 Billion by 2032, exhibiting a growth rate (CAGR) of 5.51% during 2024-2032.

A drug-eluting stent (DES) is a coronary device that is used for the slow release of drugs in peripheral or coronary arteries to block cell proliferation and promote a healthy flow of blood. It consists of a metallic stent, polymer coating and anti-restenosis drug. The stent is coated with medications that assist the arteries to remain smooth and ensure adequate blood flow. DES is widely used to treat blockages in heart arteries, prevent plaque buildup, blood clots and reduce repeated revascularization. The stent is minimally invasive (MI) and offers lower restenosis rates, enhanced vessel healing and reduced need for prolonged dual antiplatelet therapy.

Drug-Eluting Stents Market Trends:

The rising geriatric population prone to chronic medical ailments is one of the key factors driving the growth of the market. DES is widely utilized in patients with a high risk of developing arterial disorders as the stents aid in reducing the need for invasive procedures, such as coronary artery bypass surgeries. Additionally, the increasing prevalence of cardiovascular diseases due to the unhealthy dietary patterns, lack of physical activity and sedentary lifestyles of the masses is favoring the market growth. Moreover, various technological advancements, such as the launch of bioresorbable stents, are providing a thrust to the market growth. These stents are easily dissolvable in the body and reduce the risk of developing stent thrombosis. In line with this, the widespread adoption of stents with polymer-free coatings is positively impacting the market growth. These stents exhibit a higher drug loading capacity and quicker drug-eluting rate. Other factors, including the rising incidence of abnormal heart rhythms, heart failure and heart attack disease, along with the increasing demand for MI techniques among the masses, are anticipated to drive the market toward growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global drug-eluting stents market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on coating, drug, stent platform, generation, application and end user.

Breakup by Coating:

- Polymer Based Coating
- Polymer Free Coating

Breakup by Drug:

- Sirolimus
- Paclitaxel
- Zotarolimus
- Everolimus
- Biolimus
- Others

Breakup by Stent Platform:

- Stainless-steel
- Cobalt-Chromium

Platinum-Chromium
Nitinol
Others

Breakup by Generation:

1st Generation
2nd Generation
3rd Generation
4th Generation

Breakup by Application:

Coronary Artery Disease
Peripheral Artery Disease

Breakup by End User:

Hospitals
Ambulatory Surgical Centers
Others

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy

Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Abbott Laboratories, B. Braun Melsungen AG, Biosensors International Group Ltd., Biotronik, Boston Scientific Corporation, Cardinal Health Inc., Cook Medical LLC (Cook Group Incorporated), Lepu Medical Technology (Beijing) Co. Ltd., Medtronic plc, MicroPort Scientific Corporation, Sino Medical Sciences Technology Inc. and Terumo Corporation.

Key Questions Answered in This Report

1. What was the size of the global drug-eluting stents market in 2023?
2. What is the expected growth rate of the global drug-eluting stents market during 2024-2032?
3. What are the key factors driving the global drug-eluting stents market?
4. What has been the impact of COVID-19 on the global drug-eluting stents market?
5. What is the breakup of the global drug-eluting stents market based on the coating?
6. What is the breakup of the global drug-eluting stents market based on the stent platform?
7. What is the breakup of the global drug-eluting stents market based on the application?
8. What is the breakup of the global drug-eluting stents market based on the end user?
9. What are the key regions in the global drug-eluting stents market?
10. Who are the key players/companies in the global drug-eluting stents market?
