### Market Overview:

The global dry beans market size reached US\$ 6.7 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 8.7 Billion by 2028, exhibiting a growth rate (CAGR) of 4.3% during 2023-2028. The increasing consumption of dry beans, easy product availability via online and offline channels and the growing popularity of vegan and vegetarian diets among the masses represent some of the key factors driving the market.

Dry beans are types of legumes that are harvested when they are fully mature and have dried out. They are an important staple food in many cultures around the world and have been consumed for thousands of years. They are a great source of protein, fiber, and complex carbohydrates and are also low in fat, cholesterol-free, and gluten-free, making them a healthy choice for individuals with a variety of dietary needs. Some of the popular types of cannellini, fava, fayot, lima, adzuki and chickpeas, which have a unique flavors and textures and can be cooked in a variety of ways. They are widely used in a variety of dishes, including soups, stews, chili, salads, and dips and can also be mashed and utilized as a substitute for meat in vegetarian and vegan recipes. In addition to being a nutritious food source, dry beans are also an environmentally friendly crop as they require less water and fertilizer to grow than other protein sources like meat, and they also help to improve soil health by fixing nitrogen in the soil.

### Dry Beans Market Trends:

The global market is primarily driven by the growing consumption of dry beans among the masses. This can be attributed to the increasing awareness regarding the health

benefits of dry beans among individuals. In addition to this, with an increasing focus on health and wellness, there has been a shift towards plant-based foods as a healthy source of protein and other essential nutrients, along with the growing popularity of vegan and vegetarian diets is also driving demand for dry beans across the globe. In line with this, the changing consumer preference for natural and minimally processed foods as a convenient food option is providing a boost to the sales of dry beans. Apart from this, easy product availability via online and offline organized distribution channels and the advent of home delivery models are creating a positive market outlook. Moreover, dry beans are a convenient food option since they can be stored for long periods without refrigeration and can be easily prepared by boiling or pressure-cooking, which makes them an attractive option for busy consumers looking for quick and healthy meal options, further impacting the market favorably. Other factors, including continual improvements in the agriculture industry and the widespread product demand across the food and beverage industry, are also positively influencing the market.
