Abstracts

The global e-cigarette market size reached US\$ 21.8 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 31.9 Billion by 2028, exhibiting a growth rate (CAGR) of 4.4% during 2023-2028.

E-cigarettes are battery-powered devices that are considered less toxic than traditional cigarettes. Also known as e-cigs, e-vaping devices, vape pens and electronic cigarettes, these cigarettes consist of three main components, namely, a heating coil, battery and an e-liquid cartridge. These components help in delivering dosages of vaporized nicotine or flavored solutions to the users. E-cigarettes are gaining popularity, especially among young adults and adolescents, due to the rising awareness about the harmful effects of traditional tobacco-based cigarettes. However, researchers are still assessing the impact of e-cigarettes on the human body, which is not yet known.

E-Cigarette Market Drivers:

The willingness of consumers to quit smoking tobacco products and their perception of e-cigarettes as a safer alternative to traditional cigarettes have led to the increased demand for these devices across the globe. In line with this, the manufacturers are introducing new-generation e-cigarettes which offer different strengths of nicotine and allow the users to refill the cartridge. Moreover, the leading manufacturers are acquiring or entering into partnerships with small and domestic vendors. For instance, Japan Tobacco International (JTI) acquired the UK-based e-cigarette brand E-Lites to develop new products and to commercialize its vaporizers worldwide. These players are also introducing an extensive range of flavors, such as tobacco, fruits and botanicals, in response to the evolving consumer preferences. Further, they are developing the designs of and technology used in e-cigarettes to improve their functioning.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global e-cigarette market report, along with forecasts at the global and regional level from 2023-2028. Our report has categorized the market based on product, flavor, mode of operation and distribution channel.

Breakup by Product:

- Modular E-Cigarette
- Rechargeable E-Cigarette
- Next-Generation E-Cigarette
- Disposable E-Cigarette

Next-generation e-cigarettes currently represent the most popular product type in the market as they provide significant technology upgrades and extended battery life.

Breakup by Flavor:
