Abstracts

The 7 major ependymoma markets are expected to exhibit a CAGR of 4.03% during 2024-2034.

The ependymoma market has been comprehensively analyzed in IMARC's new report titled "Ependymoma Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Ependymoma refers to a type of brain tumor that originates from the ependymal cells present in the lining of the ventricles and central canal of the spinal cord. These tumors are relatively rare and typically occur in children and young adults, although they can affect individuals of any age. The symptoms of the illness vary widely from person to person, depending on the location and size of the tumor. Some of the common indications associated with this condition are persistent or worsening headaches, nausea, vomiting, seizures, changes in behavior or personality, blurred or double vision, visual disturbances, etc. In children, symptoms may also include delays in developmental milestones or transitions in school performance. The diagnosis of ependymoma is mainly based on a person's reported indications, medical history, and physical tests. Various imaging procedures, such as magnetic resonance imaging (MRI) and computed tomography (CT) scans, are utilized to visualize the tumor's location, size, and characteristics. Additionally, a biopsy of the affected site, followed by its laboratory analysis, is further recommended to confirm a diagnosis and determine the severity of the disease.

The increasing prevalence of genetic mutations that regulate cell proliferation, division, and differentiation, leading to uncontrolled tissue growth and the formation of tumors, is primarily driving the ependymoma market. Furthermore, the rising incidences of exposure to ionizing radiation, which generates free radicals in the body that may result

in direct or indirect DNA damage, are also bolstering the market growth. In addition to this, the widespread utilization of chemotherapeutic drugs, including cisplatin, carboplatin, vincristine, etoposide, etc., to target and kill cancerous cells is acting as another significant growth-inducing factor. Moreover, the inflating demand for stereotactic radiosurgery on account of its several benefits, such as favorable survival rates, fast recovery time, and fewer side effects compared to other conventional treatments, is further creating a positive outlook for the market. Apart from this, the emerging popularity of targeted therapies, including histone demethylase inhibitors, which are specifically designed to suppress the molecular pathways and genetic alterations associated with the ailment, is expected to drive the ependymoma market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the ependymoma market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for ependymoma and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the ependymoma market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the ependymoma market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the ependymoma market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current ependymoma marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Drug Overview

Mechanism of Action

Regulatory Status

Clinical Trial Results

Drug Uptake and Market Performance

Late-Stage Pipeline Drugs

*Kindly note that the drugs in the above table only represent a partial list of marketed/pipeline drugs, and the complete list has been provided in the report.

Key Questions Answered in this Report:

Market Insights

How has the ependymoma market performed so far and how will it perform in the

coming years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the ependymoma market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the ependymoma market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of ependymoma across the seven major markets?

What is the number of prevalent cases (2018-2034) of ependymoma by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of ependymoma by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with ependymoma across the seven major markets?

What is the size of the ependymoma patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of ependymoma?

What will be the growth rate of patients across the seven major markets?

Ependymoma: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for ependymoma drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the ependymoma market?

What are the key regulatory events related to the ependymoma market?

What is the structure of clinical trial landscape by status related to the ependymoma market?

What is the structure of clinical trial landscape by phase related to the ependymoma market?

What is the structure of clinical trial landscape by route of administration related to the ependymoma market?

12.1.2.1 Drug Overview

12.1.2.2 Mechanism of Action

12.1.2.3 Clinical Trial Results

12.1.2.4 Safety and Efficacy

12.1.2.5 Regulatory Status

12.1.3 Erlotinib - Astellas Pharma/Roche

12.1.3.1 Drug Overview

12.1.3.2 Mechanism of Action

12.1.3.3 Clinical Trial Results

12.1.3.4 Safety and Efficacy

12.1.3.5 Regulatory Status

Kindly note that the above only represents a partial list of pipeline drugs, and the complete list has been provided in the report.

13. EPENDYMOMA - ATTRIBUTE ANALYSIS OF KEY MARKETED AND PIPELINE DRUGS

14. EPENDYMOMA – CLINICAL TRIAL LANDSCAPE

14.1 Drugs by Status

14.2 Drugs by Phase

14.3 Drugs by Route of Administration

14.4 Key Regulatory Events

15 EPENDYMOMA - MARKET SCENARIO

15.1 Market Scenario - Key Insights

15.2 Market Scenario - Top 7 Markets

15.2.1 Ependymoma - Market Size

- 15.2.1.1 Market Size (2018-2023)
- 15.2.1.2 Market Forecast (2024-2034)
- 15.2.2 Ependymoma - Market Size by Therapies
 - 15.2.2.1 Market Size by Therapies (2018-2023)
