## Abstracts

The European school furniture market size reached US\$ 1,533.0 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 2,122.1 Million by 2028, exhibiting a growth rate (CAGR) of 5.41% during 2023-2028.

School furniture represents a catalyst in transforming classrooms from static physical spaces into dynamic learning environments. School furniture should be designed in a way which is not only considered productive for human use but also beneficial for physical and mental health.

Good furniture has a positive impact on both the student's health and their classroom development. The development of portable technologies and mobile furniture also allows institutions with a flexible learning space. Moreover, in school environment, ergonomics is important for student's interaction within the classroom. Inadequate school furniture can bring about negative consequences, leading to health issues due to pain and discomfort caused by the traditional furniture. With ergonomic furniture, students have a better posture, are more concentrated during classes and obtain better results. Various other factors such as increased focus on aesthetics, rising focus on environment-friendly furniture, rising number of schools, changing teaching methods, rising use of advanced materials, etc. are also expected to have a positive impact on the market.
