Abstracts

The 7 major exanthema markets reached a value of US\$ 1.3 Billion in 2023. Looking forward, IMARC Group expects the 7MM to reach US\$ 2.4 Billion by 2034, exhibiting a growth rate (CAGR) of 5.32% during 2024-2034.

The exanthema market has been comprehensively analyzed in IMARC's new report titled "Exanthema Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity, and Forecast 2024-2034". Exanthema refers to a type of skin rash characterized by the simultaneous appearance of multiple red, raised lesions on the skin. The rash can be localized to specific areas of the body or may spread across larger regions, such as the trunk, limbs, or face. This condition typically leads to inflammation of the skin, causing redness, warmth, and swelling in the affected parts. The disease can vary in its presentation, ranging from small, discrete spots to larger, confluent patches. Some of the common systemic symptoms associated with exanthema include fever, malaise, headache, body aches, sore throat, respiratory problems, etc. Individuals suffering from this ailment may also experience a painful, itchy rash that is tender to touch. The diagnosis of the illness is mainly based on an evaluation of the patient's medical history, underlying indications, and physical tests. During a physical exam, the healthcare provider may thoroughly check the rash and perform several diagnostic tests to determine the cause. Additionally, viral swabs for the analysis of culture, immunofluorescence technique, and polymerase chain reaction test are recommended among patients.

The rising cases of viral infections that can damage the skin or generate a reaction to toxins produced by the virus are primarily driving the exanthema market. In addition to this, the increasing prevalence of several associated risk factors, including bacterial

infections, allergic reactions, drug side effects, autoimmune diseases, etc., is also bolstering the market growth. Furthermore, the widespread adoption of over-the-counter antihistamines, such as loratadine and diphenhydramine, for treating the ailment is acting as another significant growth-inducing factor. These therapeutic agents work by blocking the effects of histamines that are released by the immune system to help in reducing the disease symptoms, like itching, swelling, and rash. Additionally, the inflating utilization of topical corticosteroids, which can aid in constricting blood vessels to decrease inflammation, alleviate pain and soreness, and enhance treatment outcomes, is also creating a positive outlook for the market. Moreover, the emerging popularity of targeted therapies owing to their numerous advantages, including a more focused and tailored therapy approach, improved efficacy, and minimal side effects, is expected to drive the exanthema market in the coming years.

IMARC Group's new report provides an exhaustive analysis of the exanthema market in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan. This includes treatment practices, in-market, and pipeline drugs, share of individual therapies, market performance across the seven major markets, market performance of key companies and their drugs, etc. The report also provides the current and future patient pool across the seven major markets. According to the report the United States has the largest patient pool for exanthema and also represents the largest market for its treatment. Furthermore, the current treatment practice/algorithm, market drivers, challenges, opportunities, reimbursement scenario and unmet medical needs, etc. have also been provided in the report. This report is a must-read for manufacturers, investors, business strategists, researchers, consultants, and all those who have any kind of stake or are planning to foray into the exanthema market in any manner.

Time Period of the Study

Base Year: 2023

Historical Period: 2018-2023

Market Forecast: 2024-2034

Countries Covered

United States

Germany

France

United Kingdom

Italy

Spain
Japan

Analysis Covered Across Each Country

Historical, current, and future epidemiology scenario

Historical, current, and future performance of the exanthema market

Historical, current, and future performance of various therapeutic categories in the market

Sales of various drugs across the exanthema market

Reimbursement scenario in the market

In-market and pipeline drugs

Competitive Landscape:

This report also provides a detailed analysis of the current exanthema marketed drugs and late-stage pipeline drugs.

In-Market Drugs

Key Questions Answered in this Report:

Market Insights

How has the exanthema market performed so far and how will it perform in the coming

years?

What are the markets shares of various therapeutic segments in 2023 and how are they expected to perform till 2034?

What was the country-wise size of the exanthema market across the seven major markets in 2023 and what will it look like in 2034?

What is the growth rate of the exanthema market across the seven major markets and what will be the expected growth over the next ten years?

What are the key unmet needs in the market?

Epidemiology Insights

What is the number of prevalent cases (2018-2034) of exanthema across the seven major markets?

What is the number of prevalent cases (2018-2034) of exanthema by age across the seven major markets?

What is the number of prevalent cases (2018-2034) of exanthema by gender across the seven major markets?

How many patients are diagnosed (2018-2034) with exanthema across the seven major markets?

What is the size of the exanthema patient pool (2018-2023) across the seven major markets?

What would be the forecasted patient pool (2024-2034) across the seven major markets?

What are the key factors driving the epidemiological trend of exanthema?

What will be the growth rate of patients across the seven major markets?

Exanthema: Current Treatment Scenario, Marketed Drugs and Emerging Therapies

What are the current marketed drugs and what are their market performance?

What are the key pipeline drugs and how are they expected to perform in the coming years?

How safe are the current marketed drugs and what are their efficacies?

How safe are the late-stage pipeline drugs and what are their efficacies?

What are the current treatment guidelines for exanthema drugs across the seven major markets?

Who are the key companies in the market and what are their market shares?

What are the key mergers and acquisitions, licensing activities, collaborations, etc. related to the exanthema market?

What are the key regulatory events related to the exanthema market?

What is the structure of clinical trial landscape by status related to the exanthema market?

What is the structure of clinical trial landscape by phase related to the exanthema market?

What is the structure of clinical trial landscape by route of administration related to the exanthema market?

12.1.2.1 Drug Overview

12.1.2.2 Mechanism of Action

12.1.2.3 Clinical Trial Results

12.1.2.4 Safety and Efficacy

12.1.2.5 Regulatory Status

12.1.3 Doxycycline foam - Foamix

12.1.3.1 Drug Overview

12.1.3.2 Mechanism of Action

12.1.3.3 Clinical Trial Results

12.1.3.4 Safety and Efficacy

12.1.3.5 Regulatory Status

Kindly note that the above only represents a partial list of pipeline drugs, and the complete list has been provided in the report.

13. EXANTHEMA - ATTRIBUTE ANALYSIS OF KEY MARKETED AND PIPELINE DRUGS

14. EXANTHEMA – CLINICAL TRIAL LANDSCAPE

14.1 Drugs by Status

14.2 Drugs by Phase

14.3 Drugs by Route of Administration

14.4 Key Regulatory Events

15 EXANTHEMA - MARKET SCENARIO

15.1 Market Scenario - Key Insights

15.2 Market Scenario - Top 7 Markets

15.2.1 Exanthema - Market Size

- 15.2.1.1 Market Size (2018-2023)
- 15.2.1.2 Market Forecast (2024-2034)
- 15.2.2 Exanthema - Market Size by Therapies
 - 15.2.2.1 Market Size by Therapies (2018-2023)
 - 15.2.2.2 Market Forecast by Therapies (2024-2034)
