Abstracts

The global faucet market size reached US\$ 26.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 42.7 Billion by 2028, exhibiting a growth rate (CAGR) of 7.85% during 2023-2028.

A faucet refers to a plumbing fixture used for regulating the flow of a liquid or gas from a reservoir. It is usually manufactured using brass, steel, die-cast zinc and chrome-plated plastic and consists of a handle, cartridge, spout, mixing chamber, aerator and an inlet source. Some of the most commonly used faucets include pull-down, pull-out, hands-free, bar, pot and side spray faucets. Apart from these, single and dual control cartridge faucets are also used for residential applications. Single control variants consist of a metal or plastic core that operates vertically, and the dual control variants operate through a metal ball with spring-loaded rubber seals fitted into the body. These faucets are available in a wide range of colors, styles and finishing that can be customized according to the user requirements.

Faucet Market Trends:

Rapid urbanization, along with significant growth in the residential sector, is one of the key factors creating a positive outlook for the market. Furthermore, with the changing lifestyles and improving standards of living, there is an increasing demand for luxurious and ergonomically designed faucets that are convenient to use and are also aesthetically appealing. Additionally, various product innovations, such as the development of touch-free, digital and hybrid smart faucets that are equipped with efficiency sensors and temperature gauges, are acting as other growth-inducing factors. In line with this, aggressive promotional activities by the manufacturers and the proliferation of online retail channels that provide users with a wide variety of products to choose from, are also contributing to the market growth. Other factors, including

rising expenditure capacities of the consumers, along with increasing product adoption across residential, commercial and hospitality sectors, are anticipated to drive the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global faucet market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on type, application, technology, materials, distribution channel and end user.
